Smart Wifi socket manual

Dear Customer,  
Thank you very much for choosing our Smart Wifi socket. This product is developed based on the latest 2.4GHz technology, the most sophisticated production process and our years of development experiences. All the functions of the product can be locally or remotely controlled by this App in your smartphone. In order to facilitate the installation or use of the product, please read this App manual carefully.

#### I. Product features

1. Wide voltage input
2. Remote control
3. Status indication
4. Timing control

#### II. Technical parameters

1. Rated voltage: AC100-240V
2. Rated current: 10A
3. Rated frequency: 50/60HZ
4. Wireless standard: 2.4GHz 802.11b/g/n(HT20)
5. Maximum power: 2000W
6. Product dimensions: 100 x 60 x 43mm

#### III. Product Diagram

#### IV. Installation

Plug the product into appropriate electrical outlet

#### V. Instruction for use

Scan the QR code on the manual and eFamily App download page appears. Click the "Download" button, wait until the download is finished, click the "Install" button and the system will be installed automatically.

Open the app, click "Register" (please read the terms and conditions carefully before registration), enter your mobile phone number and click "Next". After receiving a verification code, please enter it in the input box and click "Next". Click "OK" after your login password has been set.

1. Plug the device into appropriate electrical outlet, the blue indicator light twinkles;
2. Enter the App, and click "+" on the upper right corner;
3. Quick config;
4. Confirm the Wifi name is the same as the one connected with your phone;
5. Enter Wifi password;

6. Click "Confirm";
7. Wait until buffer is finished, the setup is successful if "1 connected" the number in the front is the quantity of the configured sockets; 0 means the connection is unsuccessful, and the blue light stops twinkling;

8. After the socket connected, the socket icon will show up on the app;
9. Click the icon and enter the control interface;
10. Click the big icon to control the switch of the socket. Grey means off, green means on, yellow means the communication is disconnected or not in use.
11. Timing switch

(1) Click "Timing switch", enter the control interface, then click "Add". Click "Repeat once", and then set time as required.

- (2) Click "Turn on", a "✓" is shown on the right, and then slide the figures below to set the turn-on time.
- (3) Click "Turn off", a "✓" is shown on the right, and then slide the figures below to set the turn-off time.
- (4) Click "Yes" on the upper right corner to complete the operation

#### Note:

1. The first device connected with the smart socket is the main smartphone. If a second smartphone is required to be connected with the socket, you need to enter the "Authority management" interface through the main smartphone, enter the number of the second smartphone to obtain permission. Then the second smartphone can start the "Scan devices". The same rule applies if it is needed to add more phone numbers.
2. Press the "Control" key 6 seconds to restore the factory settings

#### VI. Warranty description

We offer a one-year manufacturer warranty for the product. The warranty is only applicable to the use of the product as per instructions and intended purpose. Original purchase vouchers (invoice, sale slip or receipt) indicating the purchase date, distributor name and product description shall be provided if you submit an application for repair under the warranty scope.

The following circumstances are beyond the scope of warranty:

1. There are changes, alter, deletion or illegible handwriting on the sale slip or product manual.
2. The failure is caused by damage, misconnection or incorrect usage.
3. The damage is caused by extreme environment or reasons unrelated to the product (such as lightning, fire, flood and other natural disasters).

4. The product is opened or disassembled without permission.
5. The product malfunction (such as damp or corrosion) is caused by usage, maintenance and keeping of the product not in accordance with the product manual.
6. The malfunction, visual deformation, visual damage or other physical damages are caused by external forces.

#### Warning:

1. Please do not use the device under humid, high temperature environment.
2. Please do not use the product in the bed sheets.
3. Please do not connect to any household appliances over 2500W.
4. Indoor use only.
5. Please do not take apart the device without turning off the device.
6. Please keep the device away from children.

#### FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body. Use only the supplied antenna. FCC ID: 2AJK8-SWA1
