Charging function

When the battery is low, low voltage indicator light flicker, timely to remind you to charge the mouse

Please use the attached USB mouse line for charging, charging indicator lights, the charging process about 8-10 When the left and right, full of electricity after the lights went out, each charge about 6 months or so.

Data parameter

Basic:

Data transmission: 1Mbps
Frequency: 2402MHZ-2480MHZ
Channel: 16
Engine: Optical
Distance: 30m
Voltage: 3V
Current: 4mA
Key life: 500W Above
Size: 115x78x38mm
Weight: 95g

Tracking performance:

Resolution: 1000-1600-2000-2400DPI
Rate of return: 250-500Hz
Max. acceleration: 20G

System requirement:

- ▶ IBM or compatible computer
- ▶ Windows: 2000/ ME/ XP(x64) / Vista / 7/ 8
- ▶ Mac OS X(More than V10.4)
- ▶ Workable USB port

Step current:

Working current = 4mA
Standby current = 1.3mA
Dormancy current = 50uA
No receiver state = 10-25uA

§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
