

User Guide

Hill-ROM WIFI Dongle

Intended Users

Hill-Rom service technicians

- allowed to install/uninstall the WIFI dongle into the wireless compartment of Monarch control box.

Patient/Caregivers

- allowed to join a preferred WIFI network. Wireless data transmission is automatic, no intervention from user is needed.

General Steps to operate the Dongle

- 1) Insert the WIFI dongle to the USB port at the wireless compartment.
- 2) Press the power button in the directional keypad on the handheld control.
- 3) A splash screen shall appear for 3-5 seconds as shown(Figure 1).
- 4) The following steps shall use the directional keypad for navigating the menu.

Figure 1

Directional keypad

General Steps to operate the Dongle

After 3-5 seconds, the screen in Figure 2 shall appear. Press the DOWN button until “MENU” is selected(Figure 3) and press the OK button. Select “DEVICE SETTINGS”(Figure 4) and press OK to go to “WIRELESS” screen (Figure 5). Press OK again.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and**
- (2) this device must accept any interference received, including interference that may cause undesired operation.**

Notice:

Any changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class

B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to

provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.**
- Increase the separation between the equipment and receiver.**
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.**
- Consult the dealer or an experienced radio/ TV technician for help.**

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device was tested for typical lap held operations with the device contacted directly to the human body to the back side of the notebook computer. To maintain compliance with FCC RF exposure compliance requirements, avoid direct contact to the transmitting antenna during transmitting.

SAR information 0.94 W/kg@1g (body)
