your choice for audio
entertainment!**

Specifications

Mid Bass Driver:

6.5” (165 mm)
Poly injection cone
Rubber surround

Tweeter:

1" (25 mm) PEI dome tweeter

Crossover network:

Built-in

Impedance:

4 Ohms

Frequency Response:

140Hz - 20kHz

Sensitivity:

93dB (1 watt/1 meter)

Dimensions (W x H x D):

7.19" x 9.88" x 7.31"
(182 x 250 x 186 mm)

Weight (in gift box):

10.7 lbs (4.85 kg)

Amplifier:

Input Impedance: 10kΩ
Frequency Response: 20Hz - 20kHz

Bluetooth:

Version: 5.0 w/ EDR
A2DP
Range: 33ft (10m)
Network Name: BOSS Audio Systems B6ABT

USER MANUAL

Introduction

Your new B6ABT waketower speakers are high-power,
fully-waterproof 2-way systems featuring 6.5” drivers and
a 1” PEI dome tweeter.

 understands that wake tower speakers are used in many
different types of installations. Our versatile mounting solutions give
you the ability to attach our wake tower speakers to mounting tubes
with diameters of 1.5” - 2” (38 - 51mm).

What is included?

Before you begin installation, please check that your product contains
the following contents:

- (2) Speaker pods
- (4) 130x14x2mm rubber mounting strips
- (4) 120x14x1mm rubber mounting strips
- (2) 48x30x2mm rubber mounting pads
- (4) 2" mounting aluminum bands for 2" and 1.875" installation.
- (4) 1.75" mounting aluminum bands for 1.75" and 1.5" installation.
- (4) M6 locknuts
- (4) M6 flat washers
- (4) M6x60mm screws
- (1) Power/speaker wire harness
- (1) 3.5 mm audio cable

Safety considerations when installing

Please remember that these are heavy products that will be installed in a
boating environment. These vehicles can travel at high speeds and be unstable.
So please consider this and use extreme caution.

Some safety considerations include:

- 1- Do not mount the speakers in a location where someone may either walk
into or strike their head. During a turbulent ride, please make sure that you do
not loosen footing and fall or hit the unit, or it may cause injury.
- 2- Secure the wires to the speakers in multiple locations along their route to
your audio source, so that there are no hanging loops of wire. Having unsecure
wires in any hanging conditions can cause entanglement and injury.
- 3- Tighten the aluminum bands with rubber inserts using care. Do not over
compress the rubber inserts. After installation is complete, please recheck all
bolts and tighten them further if needed before taking your boat or vessel out
for an audio adventure.
- 4- Do not install these speakers where they may block the view of the pilot and
prevent safe operation of the vessel or vehicle.

USER MANUAL

B6ABT
6.5" (165 mm) 2-Way Marine/Powersports
Roll Cage/Waketower Speaker Pods

It is strongly recommended that you work with an assistant to install these speakers.

Installation instructions

STEP1

To adjust the mounting angle, loosen the metal base of the mounting band by unbolting the two screws.
Make sure to put all components of the mounting hardware in a safe location.

STEP2

Twist the metal base to determine the optimal mounting angle for the speaker on the cage bar. Then secure the metal base by tightening the two screws.

STEP3

Place a supplied rubber pad (48 x 30 mm) on the metal base of the mounting band to prevent abrasion and secure clamping.

STEP4

Place two supplied rubber strips around the cage bar to prevent abrasion and secure clamping. Then push two supplied aluminum bands over the cage bar, and align the aluminum bands with the metal base on the speakers.

USER MANUAL

Roll Cage/Waketower Speaker Pods

STEP5

As illustrated, secure the aluminum bands to the metal base using a pair of M6 x 60mm screws, M6 flat washers, and M6 locknuts. The locknuts must be installed into the hex shaped recess on one end of each aluminum band.
Hand-tighten the screws to the degree which allows just enough freedom to rotate the speaker around the cage bar.

STEP6

Speaker installation now completes.

Bluetooth

Through Bluetooth connection, you can stream music from a Bluetooth device (e.g. a mobile phone) to the speakers. Make sure Bluetooth is enabled on the device. When the device is in Bluetooth range, it will connect Bluetooth automatically and will be disconnected when it is out of Bluetooth range.

AUX input

Using the supplied 3.5mm audio cable, connect the speaker to your mobile phone for audio input to the speakers. Make sure Bluetooth connection is not made to enable AUX input.

Product dimensions

Wiring

12V wire harness connection

- 1) Connect the RCA plugs (red/white) to an external amplifier for audio output.
- 2) Connect the ACC wire (red) to the accessory power of the vehicle as ON/OFF switch of the speakers.
- 3) Connect the remote out wire (blue) to an external amplifier as ON/OFF switch of the amplifier.

FCC compliance statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC rules

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF radiation exposure statement

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
