FCC Warnning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2)this device must accept any interference received, including interference that may cause undesired operation.

POS Terminal

Model: P90

user manual

1.Packing list

No.	Name	Quantity
1	P90 wireless POS terminal	1
2	User manual	1
3	Battery	1
4	Cable	1
5	Power adapter	1
6	Reflective mirror structure (optional)	1
7	Handwritten pen (optional)	1

2.Installation instructions

SIM/SAM card : Shutdown the machine, open the battery cover, take out battery, put SIM/SAM card chip face down and insert into the corresponding identification card slot.
Battery : Open the battery cover, insert the battery plug into the battery socket, Put the battery into the battery tank, place the protruding part towards the head to close the battery cover conveniently.
Battery cover : Insert the upper end of the battery cover into the machine,and then fasten the clasp downward.
Note : 1. Before installing the battery, please check the battery appearance without any damage.
2. If the battery cover is held up, please turn the battery to install.

3. Product operation

Power on：Long press the power button for 3 seconds, the backlight of the screen lights up, and the terminal is activated.
Close：Long press the power button for 3 seconds, the POS machine enters the shutdown process.
Charging：After installing the battery and closing the battery cover, connect the Micro-USB interface of POS device.Connect the adapter at one end and start charging after turning on the power.
For detailed instructions and common fault analysis, please scan the QR code below.

Scan the qr code above, download and read the detailed instructions and troubleshooting.

Scan the qr code above, input the wi-fi information, click to generate a new qr code, scan the code to complete the wi-fi connection automatically.

4.Matters needing attention

4.1.Only applicable to 5V chargers.
4.2.Before connecting AC power, please check the power cord and power adapter for damage.If there is, it can no longer be used.
4.3.The equipment should be placed on a stable platform indoors. Do not place it in direct sunlight, high temperature, humidity or dusty place. Please keep away from liquid.
4.4.Do not insert any foreign object into any interface of the device, which may seriously damage the device;
4.5.If equipment failure, please contact POS after-sales service personnel. Users are not allowed to repair the equipment without authorization.
4.6.Scanning is only available for devices with a camera version.
4.7.The software of different dealers is different and the operation is different. The above operations are for reference only.

5.List of hazardous substances

Part name	Harmful substances					
	Pb	Hg	Cd	Cr(VI)	PBB	PBDE
Shell	○	○	○	○	○	○
Circuit board	×	○	○	○	○	○
Power	×	○	○	○	○	○
Cable	○	○	○	○	○	○
Packaging	○	○	○	○	○	○
Battery	×	○	○	○	○	○

This form is prepared in accordance with SJ/T 11364
○：Indicates that the content of the hazardous substance in all uniform materials of the component is below the limit specified in GB/T 26572.
×：Indicates that the content of the hazardous substance in at least one uniform material of the component exceeds the limit specified in GB/T 26572.
PS：1.Most parts of the product are made of harmless and environment-friendly materials, the parts containing harmful substances cannot be replaced due to the limitation of global technology development level.
2.Environmental data for reference are obtained By testing in the normal use and storage environment required by the product, such as humidity and temperature.

Specific Absorption Rate (SAR) information:

This POS Terminal meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: POS Terminal has also been tested against this SAR limit. This device was tested for typical body-worn operations with the back of the phone kept 0mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain an 0mm separation distance between the user's body and the back of the phone. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
