FCC Statement

FCF Statement

Changes or modifications not expressly approved by the party responsible for compliance may void the user's authority to operate this equipment.

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules, which imposes certain restrictions on the operation of this equipment to prevent harmful interference to a licensed radio communication system. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, the user is encouraged to try the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) If this device does cause any interference received, including interference that may cause undesired operation.
