

Scorpion Air Pro

※ Thank you for using this digital product of our company. In order to let you experience the product swimmingly, detailed instruction is provided which you can find the product's introduction, usage and other information. Before using this product, please read the manual carefully, so that you can correctly use it. In case of any printing or translation error, we apologize for the inconvenience. As for the content charge, we are sorry for no further notice.

The relationship between discharging indicators and battery power:

- 81%~100%
- 61%~80%
- 31%~61%
- 1%~30%

The indicator will light out after the mobile phone is removed, the UBA12000 will turn into standby mode and automatically turn off in 60 seconds. When the UBA12000 begin wireless charging, UBA12000 can charge the another device by built-in cable.

Note: When a phone that supports wireless charging is being charged through a cable, it is not recommended to place the phone close to the wireless charging coils.

Q: Why does the product heat up when it is charging/discharging?
A: UBA12000 heats up during charge and discharge cycles. This is common occurrence due to power consumption, and will not affect products functionality. The product will not overheat due to its built-overcharge protection circuitry.

(Please complete warranty card and use for any future warranty service)

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. This equipment may cause interference, but it may also be susceptible to interference. It is designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna. — Increase the separation between the equipment and the receiver. — Plug the equipment into a different outlet. — Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
