

1 Test Setup Photo

Radiated Emission

Below 1GHz

Above 1GHz

The photograph shows a laboratory setup for conducted emission testing. On a light-colored wooden table, a black electronic device is connected via a long black cable to a white measurement device with a yellow and black striped base. To the right of the table, a grey power supply unit sits on a yellow and black striped safety mat. The background features a grey wall with three electrical meters mounted on it. A white cabinet is visible on the right side of the frame.
