

Letter of Authorization

Attn: To Whom it May Concern / Application Examiner / Review Engineer / Officer in Charge
Re: Authorization to Apply for a "Change in Identification" per Section §2.933(b) of 47 CFR

Dear Madam or Sir,

We, Silicon Laboratories Finland Oy, a corporation branch and subsidiary of Silicon Laboratories Inc., validly organized and existing under the laws of Finland, having its principal place of business at Alberga Business Park, Bertel Jungin aukio 3, 02600 Espoo, Finland,

in relation to our *Bluetooth* Low Energy (LE) and 802.15.4 wireless radio modules having model name of **MGM240P22A** and brand name of **SILICON LABS**, as the legal manufacturers hereby **declare** to have applied for, and to have obtained a Federal Communications Commission (FCC) Modular Grant with **FCC ID: QOQ-GM240P** (original issue date: August 26, 2022) and with this letter we **grant permission** on a one-time basis to:

Company Name: **Siemens AG GWA** [hereafter referred to as the *New Grantee*]
Full Address: Werner von Siemens Straße 48, 92220 Amberg, Germany
Grantee Code: 2AJRO

to apply for a "Change in Identification" with the FCC, as per the guidance under KDB 249634.

We understand that the New Grantee is requesting authorization to submit their application in order to integrate our modules into the unique host products that they manufacture and own, under a new identification based on their chosen naming and branding, as detailed below:

New Brand Name of Module: SIEMENS
New Model Name of Module: SIE240M
FCC ID: 2AJRO-SIE240M [applicable to the New Grantee's new listing of the renamed module]

We further understand that the New Grantee intends to submit a subsequent Class II Permissive Change (C2PC) application for their parallel grant in order to

- 1] qualify their unique host deviating from the integration guidelines and consequently requiring the RF transmit power to be reduced to preserve the compliance.

Accordingly, we authorize the FCC to use the information on file, from the original certification, to approve the requested "Change in Identification".

- ▷ We confirm we will continue supplying our MGM240P22A modules to the New Grantee unmodified and equivalent (in the design, circuitry, or construction) to the originally certified equipment. The original test results and technical documentation continue to be representative of, and applicable to the supplied equipment which will be bearing the changed identification. The original grant will remain in effect, nevertheless.
- ▷ Conversely, we emphasize having no control or responsibility with regards to the proper installation, configuration and use of our modules in the end-products manufactured and sold by the New Grantee and/or sold by their representative(s). As a result, the New Grantee will take full ownership and accountability for the compliance of their end-products, including any appropriate labelling to take into account the new identification, and commit to submit in any following permissive change application of theirs all the intended documentation, including but not limited to final product-related test reports, exterior photographs and user manuals, while strictly adhering to the FCC guidance under KDB 996369 and KDB 178919.

This authorization expires four (4) months after the date of issue. Should there be any query regarding this authorization, please do not hesitate to contact the undersigned. Thank you for your attention to this matter.

Place and date of issue (of this letter):
Espoo, September 10, 2026
