

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT (End User Terminal) housing. The housing is white plastic and is open, revealing a green printed circuit board (PCB) inside. The PCB is populated with various electronic components, including a large black integrated circuit (IC) labeled 'N75-NA', a small black component labeled 'N75-NA', and several smaller components. A white circular component is visible on the left side of the PCB. The housing is placed on a blue surface, and a black ruler with white markings is visible in the background for scale.
Solder Board-Component View 1	 A photograph showing a close-up view of the solder board-component assembly. The green PCB is populated with various electronic components, including a large black integrated circuit (IC) labeled 'N75-NA', a small black component labeled 'N75-NA', and several smaller components. The components are soldered onto the PCB. The assembly is placed on a blue surface, and a black ruler with white markings is visible in the background for scale.

Solder Board-Component View 5	

Solder Board-Component View 6	 A photograph of a yellow printed circuit board (PCB) populated with various electronic components. The components include a large yellow electrolytic capacitor, several smaller capacitors, resistors, and integrated circuits. A black component with '200503 883' and '20042' is visible. The board is placed on a blue surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
Solder Board-Component View 7	 A photograph of a green printed circuit board (PCB) populated with various electronic components. The components include several integrated circuits, resistors, and capacitors. The board is placed on a blue surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
