

Solder Board-Component View 6	 A photograph showing a small, square, dark-colored component with gold-colored leads, mounted on a blue perforated metal surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 7	 A photograph showing a green printed circuit board (PCB) populated with various electronic components, including capacitors, resistors, and a transformer. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 8	 A photograph of a green printed circuit board (PCB) populated with various electronic components, including resistors, capacitors, and integrated circuits. The board is positioned next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom. The board is placed on a blue textured surface.
Solder Board-Component View 9	 A photograph of a green circular PCB component, likely a connector or a small module, with several pins or solder points. The component is labeled with 'E1', 'N1', 'N2', 'L1', 'L2', and 'Bottom'. It is placed next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom. The component is placed on a blue textured surface.

Solder Board-Component View 10	 A photograph showing a green circular printed circuit board (PCB) with various electronic components soldered onto it. The components include several surface-mount capacitors and inductors, some labeled with 'N1', 'N2', 'L1', and 'L2'. A red wire is connected to one of the components. The PCB is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
Antenna View	WCDMA/LTE Ant  A photograph of a white rectangular device, likely a mobile phone or a testing unit, with a silver antenna attached to its side. The device has a label with technical specifications and a barcode. The antenna is a white, flexible, whip-style antenna. The device is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm. A red box highlights the antenna, and a red line points from the label 'WCDMA/LTE Ant' to it.
