

Professional Installation Attestation

KDB 353028 D01, Section II. A. 2. c

Model: ASR-053W

FCC ID: 2AJXE-ASR-053W

To Whom It May Concern:

Asterisk Inc. hereby requests that “This device must be professionally installed” be listed as a condition on the FCC grant for the ASR-053W. Asterisk Inc. requests approval under the Professional Installation provisions in accordance with KDB 353028 D01, Section II. A. 2. c. This attestation provides justification as required by the KDB.

i) Professional installation justification and grant condition

Asterisk Inc. requests the professional installation condition on the FCC grant. The justification for this request is provided in the following sections.

ii) Antenna restrictions

Only the antenna types specified in the ASR-053W user manual and in the certification filing are permitted. All permitted antennas have been evaluated; please refer to the test report.

iii) Required justification items

(1) Why the hardware is not readily available to the average consumer

The ASR-053W is not marketed through consumer retail channels. It is sold only through authorized dealers or system integrators, and therefore is not readily accessible to the general public.

(2) Marketing restrictions

The device is not sold via retail stores, online consumer websites, or mail order. Distribution is limited to authorized professionals who provide installation services.

(3) Intended use

The ASR-053W is an industrial/commercial RFID reader intended for use in stores, factories, warehouses, and other business environments. It is not intended for consumer use or for use by the general public.

(4) Why professional installation is required

Installation of the ASR-053W requires qualified personnel due to the following:

- Proper setup requires consideration of RFID output power, interference environment, antenna orientation, and placement.
- The ASR-053W operates as part of a larger sales, inventory, or production management system and cannot function as a standalone device.
- System integration requires software configuration and application development expertise.
- A complete system validation test must be performed before the system is placed into operation.

For these reasons, the device must be installed by a qualified professional and is not suitable for installation by the general public.

iv) Professional installation requirements**(1) Controlled installation**

Asterisk Inc. maintains a controlled distribution channel to ensure that installations are performed only by authorized and qualified personnel.

(2) Qualified / licensed professionals

Authorized dealers and system integrators employ qualified technical personnel with specialized RF and system-integration training. Only these personnel are permitted to install the ASR-053W.

(3) Specialized training

Installation requires specialized knowledge, including RF configuration, hardware setup, software programming, and field verification. Installers receive training specific to the ASR-053W and related systems.

Sincerely,

Asterisk Inc.
