Ready Beartooth for Adventure

Your Beartooth has been hibernating on the journey to you. It is important that you make sure your Beartooth is fully charged before you set out on your next adventure. Please fully charge Beartooth before initial operation using the enclosed USB A male to USB B micro cable via the micro-USB port found at the base of the device. The LED will flash orange while charging. You will be able to monitor Beartooth's state of charge via the Beartooth app on your smartphone.

Installation

For iOS devices, please locate the Beartooth app on iTunes, download, and install. For Android devices, please locate the Beartooth app on the Google Play store, download, and install.

Press and hold the power button until the LED flashes twice. This should take about 3 seconds.

Press and hold the Bluetooth pairing button until the LED flashes continuously. Your Beartooth is now ready to pair with the smartphone.

Start the Beartooth app and follow the pairing instruction inside smartphone phone app to pair.

The LED will turn to solid orange once you have paired successfully

You may pair and un-pair your Beartooth to a new smartphone anytime you like. Simply follow the unpair device instructions in your smartphone operating system.

BEARTOOTH

Using Beartooth

Using the Beartooth app, you can now push to talk for one to one, or group, digital voice messages, send a text, or find your friend on a map. For detailed instructions on how to use each of these features please visit our quick start guide at www.beartooth.com/start.

RF signals work best with a direct line of site. For that reason we recommend that you place your Beartooth as high in the air as possible, while still connecting to the smartphone via Bluetooth. That means if you are in camp, put Beartooth on a nice high spot. If you are mobile, put Beartooth in an outer pocket of your pack, farthest from your body, as high above the ground as practical.

Legal Notices

FCC Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an output on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution:

IMPORTANT! Changes or modifications not expressly approved by Beartooth could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

This device has been tested for RF emissions and has been deemed safe for human exposure as determined by the government's SAR testing standards.

This device complies with Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions: (1) This device may not cause harmful interference. and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

Canada, Industry Canada (IC) Notices

Cet appareil est conforme à la norme RSS d'Industrie Canada exempte de licence. Son fonctionnement est soumis aux deux conditions suivantes: (1) Ce dispositif ne doit pas causer d'interférences nuisibles, et (2) cet appareil doit accepter toute interférence reçue, y compris les interférences pouvant entraîner un fonctionnement indésirable.

CAN ICES-3 (B)/NMB-3(B)

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

This equipment complies with portable radiation exposure limits set forth for uncontrolled environment.

Cet équipement est conforme aux limites d'exposition aux rayonnements portables fixées pour un environnement non contrôlé.

Important Safety Information for Data Radios:

- Your Beartooth device contains a RF transceiver.
- Your device has been tested for and passed the FCC's RF exposure guidelines for regular body-worn operation without any modification of the hardware.
- Any modification of the hardware or use of the device not in line with provided instructions may not ensure compliance with RF exposure guidelines.
- Unauthorized modifications or attachments could damage the device and also violate FCC regulations.
- This device must not be co-located with other transmitters.

Recommended Position: For best performance we recommend that you place your Beartooth as high in the air as possible, while still connecting to the smartphone via Bluetooth. That means if you are in camp, put Beartooth on a nice high spot. If you are mobile, put Beartooth in an outer pocket of your pack, farthest from your body, as high above the ground as practical.
