Mason Smart
MGQ300

CORRECT DISPOSAL

Do not dispose your mobile and/or battery in fire or any flammable sources.

Do not dispose your mobile and/or battery with regular household waste.

For proper disposal please contact customer service.

This marking on the product, manual, accessories or packaging indicates the product and its electronic accessories (e.g. charger, headset, and USB cable) should not be disposed of with other household waste. This product is RoHS compliant

This marking on the battery, manual, or packaging indicates the batteries in this product should not be disposed of with other household waste.

FCC STATEMENT

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any Interference received, including interference that may cause undesired operation.

SAFETY INFORMATION (Con't)

Read all safety information before using the device to ensure safe and proper use.

- Do not use your device outdoors during a thunderstorm.
- Keep the device at a minimum distance of 15cm away from any active electronic medical implanted device.
- Comply with all safety warnings and regulations regarding mobile device usage while operating a vehicle.
- To prevent possible hearing damage when using a headset, do not listen at high volume for long periods of time.

SPECIFIC
ABSORPTION RATE (SAR)
CERTIFICATION INFORMATION

This device meets international guidelines for exposure to radio waves.

Your mobile device is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. The guidelines were developed by an independent scientific organization (ICNIRP) and includes a substantial safety margin designed to assure the safety of all persons regardless of age and health. The radio wave exposure guidelines uses a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 1.6W/Kg with a separation distance as follows:
Body: 0mm.
The maximum SAR for this model measured over one gram of tissue:
Body: 1.16 W/Kg

BODY-WORN OPERATION

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 0mm for body worn and 0mm for hotspot must be maintained between the user's body and the handset, including the antenna. Third-party beltclips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

SPECIFIC ABSORPTION RATE
(SAR) INFORMATION:

This device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: Device (FCC ID:2AJZP-MGQ300) has also been tested against this SAR limit. This device was tested for typical body-worn operations with the back of the handset kept 10mm for body worn and 10mm for hotspot To maintain compliance with FCC RF exposure requirements, use accessories that maintains 10mm for body worn and 10mm for hotspot. The useof belt clips, holsters and similar accessories shouldnot contain metallic components in its assembly. Theuse of accessories that do not satisfy these require-ments may not comply with FCC RF exposurerequirements, and should be avoided.

WHAT'S IN THE BOX?

HOW-TO-GET STARTED

- 1. Connect the USB-C on the cable to the power adapter.
- 2. Plug the power adapter to your wall power outlet.
- 3. Connect the USB-C cable to USB-C port below the handheld
- 4. Charge MGQ300 to 100% battery life.
- 5. Press Green Power Button to power on MGQ300.

Read all safety information before using the device to ensure safe and proper use.

Failure to follow safety and warning guidelines can result in injury and death.

- Do not expose the device to physical impact or damage.
- Only use manufacturer-approved batteries, chargers, and accessories.
- Prevent the multipurpose jack and battery terminals from contacting conductive elements such as metal or liquids.
- If any part of the device is cracked or broken, or if the device becomes very hot, stop using the device immediately.
- Do not turn on or use the device when the battery compartment is exposed.
- Do not bite or suck on the device and any accessories attached to the device.

- Do not insert the device or any attached accessories into the ears, mouth, or eyes.
- Do not use the camera flash close to the eyes of any animals or humans.
- Do not store your device In very hot or very cold ambient temperature areas. Recommended operating temperature range is between 5°C to 35°C.
- Do not store your device near high heat sources including heaters, microwaves, cooking equipment, or high pressure containers.
- Keep your device dry. Do not touch the device with wet hands.
- Avoid the use of the device in humid environments such as restrooms, and during water-based activities.

FCC CAUTION does not cause harmful

15.19 Labeling requirements
This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device interference.

15.21 Information to user
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

15.105 Information to the user
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

- measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.

MGQ300 is not a medical device and should not be used for medical purposes. The MGQ300 is not intended to diagnose, treat, cure or prevent any medical condition. If you are experiencing symptoms of a medical condition or have concerns about your health, you should seek the advice of a medical professional immediately.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:
(1) This device may not cause interference, and
(2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:
(1) l'appareil ne doit pas produire de brouillage, et
(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement
