Hi Adam

Please see the product full names and model codes below:

Multi Mouse Trap 304836

Dual Autogate Connect 304854

Bed Bug Monitor GSD-801014

The antenna for DAG is the same as LongReach AutoGate Connect approved previously, i.e. a metal piece on the pcb with a gain of -0.6dB

The MMT antenna material is copper and gain is -1.6dB

The BBM antenna is off-the-shelf. See data sheet attached.

Are these sufficient for finalizing the reports? Thanks

Kind Regards

Ning Pan
