RE: Application for End Device Approval

FCC ID : **2AK5B-S1**

To Whom It May Concern:

Please be advised that the manufacturer, DOOR Systems, Inc., requests that the above-referenced model be approved for End Device Approval.

The device is an indoor device that brings supported locks online and provides visibility into environmental and sound-based events inside the unit.

It combines lock bridge functionality and multi-sensor awareness in a single device, allowing property teams to improve remote workflows and detect issues earlier without adding additional hardware. The product transmits its data via LORA, Bluetooth Low Energy and WLAN 2.4 GHz.

This certification only shows LORA transmitting at 910.3 MHz being tested according to FCC rule part 15.249, whereas information on the BLE/WiFi module can be found under the following FCC ID: 2AC7Z-ESPC6MINI1.

Yours sincerely,

Signed by:
