UTEC, Inc. ("the applicant") certifies:

- the equipment for which authorization is sought **is not** "covered" equipment prohibited from receiving an equipment authorization pursuant to section 2.903 of the FCC rules.
- as of the date of the filing of the application, the applicant **is not** identified on the Covered list, established pursuant to §1.50002, as an entity producing "covered" equipment.
- the software to be loaded prior to marketing of the equipment identified above **is not** "covered" software manufactured by any entity including predecessors, successors, parents, subsidiaries, affiliates or any entity which has rebranded or relabeled the software produced by the entity(ies) identified on the "Covered List".
- the device is not capable of storing or running software listed on the covered list and therefore is inherently compliant.

UTEC, INC. Justification for compliance:

1. *After manufacturing, the device is architected to prevent the installation, execution, or storage of any third-party firmware not explicitly approved by Carrier. Firmware updates are securely managed through Carrier-controlled mechanisms, either locally or via Carrier's IoT portals, and are validated using encryption and integrity verification.*
2. *The device enforces strict hardware and software protections: physical debugging interfaces such as JTAG are disabled, access to command-line consoles is locked,) minimizing the risk of unauthorized modifications or escalations.*

These mechanisms ensure that only firmware explicitly vetted and approved by our organization can be installed or executed, maintaining compliance with FCC rules regarding prohibited software and equipment.
