

VIDEO DOORBELL

IN-APP SETUP

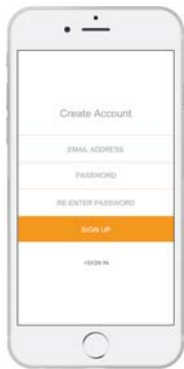

GUIDE

IN-APP SETUP

How to set it up

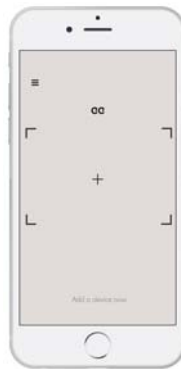

Step 1. Create an iseeBell account

Download the iseeBell App from the Apple App Store or Google Play Store by searching for iseeBell Video Doorbell. Launch the app and click the Sign Up button. Enter your name, Email address and password.

Step 2. Follow the In-app setup process

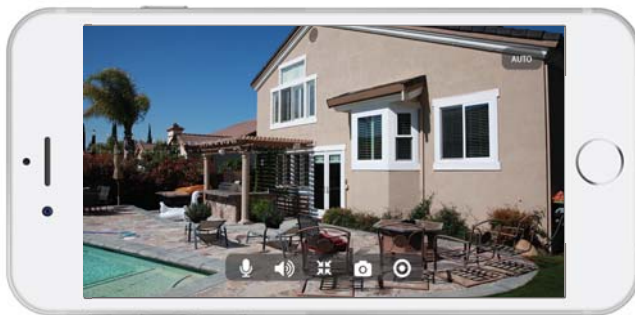

Follow the In-app setup process in the iseeBell App, select the + sign on the screen to add a new device. When prompted, select Wi-Fi Video Doorbell, and follow the In-App instruction.

IN-APP SETUP

On Demand Live View

To access an on-demand live stream of video no matter where you are, and no matter the time, select the device you've added on the center of the screen of iseeBell App.

Customize Motion Alerts

Select settings on the live view screen of the iseeBell App and schedule the motion alert to customize when you want to receive motion alerts.

Shared Users

You can share your iseeBell device with family and friends, and enable them to answer calls, view and talk to visitors. To activate this feature, select Shared on the live view screen of the iseeBell App, and enter their Email(s).

Cloud Recording

If you want to automatically record and store events captured by your iseeBell Video Doorbell straight to the Cloud, click the Cloud recording button. You can then view, download, and share these events on any device running the iseeBell App.

IN-APP SETUP

Answering Your Doorbell and Live View Mode

You can perform the following actions When someone rings your iseeBell Doorbell and you answer it or in Live View Mode:
