1) Start pairing

2) Enter the WiFi password

1) The equipment connected to the Internet

2) Distribution network success

Support 3rd Party Control

1) Type the add menu of the user panel

2) Select the third-party application to be operated

Warm Tips

• Please check whether the device is connected with power and your phone is connected with Wi-Fi.

• Check router: If the router is dual-band router, please select 2.4GHz network to add device. You also need to open the router broadcasting function as auto. The Wireless mode cannot be only 5GHz. Please make sure Wi-Fi is on. In order to use strong Wi-Fi signal, please keep device and router within a certain distance.

• Check whether connected devices have reached the maximum number router connection. If so, please try to turn off the Wi-Fi connection of some devices.

• Make sure router wireless MAC filtering function is disabled.

• Remove the device from the filter list and make sure that router is not prohibiting device from connection.

• Make sure the entered password is correct when adding a new device.

• Tips for more operations, please refer to the corresponding application tutorial.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) the device may not cause harmful interference, and (2) the device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTICE: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. This equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on. The user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver. - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. - Consult the dealer or an experienced radio/TV technician for help. To maintain compliance with FCC's RF Exposure guidelines, the equipment should be installed and operated with minimum distance between 20cm (the radiator) your body. Use only the supplied antenna.
