a. Go to **My Computer** or **This PC**.

b. Double click the **CD-ROM**, then run WiFi 6 Adapter

### Step 3 Join a Wireless Network

- Click the network icon (  or  ) on the taskbar.
- Select your Wi-Fi network, enter the password when prompted .

### ! CAUTION

- \* Do not over-rotate the antennas to avoid breakage.
- \* Do not exceed 180° rotation .

### Frequently Asked Questions(FAQ)

#### 1. Why Slow speed or Unstable connection?

Step 1. Check Wi-Fi signal strength. If signal is weak, move the computer closer to your router if possible

Step 2. Try to switch between the 2.4G and 5G channels. If it's a dual-band adapter.

Step 3. Connect to the USB 3.0 port on your computer (if it's a USB 3.0 network card).

#### 2. Why cannot connect to Wi-Fi

Step 1. Try to turn off and turn on/reboot your wireless clients to connect to the Wi-Fi. (Computer and Router)

Step 2. If the IP address is not obtained automatically, change it to Obtain IP Address Automatically.

Step 3. Change router's wireless channel.

#### 3. Why doesn't show WiFi6?

Step 1. If you purchased a Wi-Fi6 adapter, need pairing it with a Wi-Fi6 router, can achieve optimal performance

#### 4. How can I improve my speed?

Step 1. Please verify the distance and the surrounding environment, as walls or other obstacles may attenuate the signal. Repositioning the antenna may also contribute to enhanced signal reception quality.

### FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference, and  
(2) This device must accept any interference received, including interference that may cause undesired operation.

**Warning:** Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.  
Increase the separation between the equipment and receiver.  
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.  
Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement.  
The device can be used in portable exposure condition without restriction.
