1. General Information

1.1. Applied Reference Documents

The Equipment Under Test (EUT) has been tested at Linkou Laboratory according to the leading reference document in below table.:

No.	Identity	Document Title	Version/Date
1	Std 149	IEEE Standard Test Procedures for Antenna	1979

1.2. Test Setup

EUT coordinate systems of the previous sections will apply independent of the physical orientations of the EUT inside the chamber.

The figure shows the typical setup using a combined axis system. In addition to the pictured Theta axis rotation, the EUT will have to be rotated about the Z-axis (Phi rotation) in order to perform the full spherical scans.
