

■ Product Overview

Keyboard indicator	Indicator color	Indicator status
Power indicator	Red	The red light turns on for 3 seconds and then off.
Low voltage indicator	Red	The red light flashes when less than 3.5V, the red light will flash. When the voltage is lower than 3.0V, it powers off automatically.
Charging indicator	Red/Green	The red indicator light stays on and turn to green light when fully charged.
Bluetooth pairing indicator	Blue	The code-matching status will flash once for 3 seconds, and it will go out after the connection is successful. If the LED is not paired, the keyboard will enter the dormant state.
Caps lock indicator	Blue	The green light is always on when entering the uppercase state, and the light of the indicator will be turned on when the lowercase state is entered.

- Step 1. Turn on the power switch of the keyboard. Short press FN+(F4), the Bluetooth code matching indicator becomes slow flashing blue, entering the pairing state.
- Step 2. Open the Bluetooth of the device to search, the Bluetooth of the device can be searched by itself or manually to find the keyboard name (Bluetooth name: Bluetooth Keyboard), and click to connect.
- Step 3. It will show that it has been successfully connected, and the Bluetooth code matching indicator will go out.

OS system: Caps+Space or Ctrl+Space or Win+Spacebar (Because the OS system version is different, the switch is also different, you can try the above methods)

Android system: Shift+Space or Ctrl+Space or Win+Spacebar (Because the system version is different, the switch is also different, you can try the above methods)

Windows system: Ctrl+Shift

■ **Charging**

When the voltage is low, the indicator light flashes red quickly (below 3.0V automatic power off), then you need to charge the keyboard.

- 1 Connect the B end of the original Type-C cable to the keyboard c hanging port.
- 2 Connect end A of the original Type-C cable to the power adapter or the USB port of the computer.

■ **Charging** When the battery is exhausted and the indicator light flashes red quickly, you need to charge the keyboard.

Notice:

- ① In order to obtain a longer battery life, charge the keyboard only when the keyboard power light flashes.
- ② The original power cord must be used for charging under working conditions. If other data lines are used for charging during work, garbled codes and malfunctions may occur.

■ **Keyboard Specifications**

Bluetooth Specification	Bluetooth 5.0
Operating Range	Up to 10 meters
Modulation System	GFSK

Operating Voltage	3.0-4.2V
Working Current	Single finger tap: 2.2mA Turn on the LED: 2.0mA, Touchpad 8mA
Sleeping Current	10uA
Standby Time	700 days
Uninterrupted Work Time	84 hours(close CAPS LOCK)
Charge Time	≤2 hours
Lithium Battery Capacity	210 mAh
Button Force	50~80g
Button Life	≥3 million clicks
Keyboard Size	280.56"214.9"7.45mm
Weight	337.41g

- ⚠ Warning: It can cause fire, electric shock, damage of keyboard system if disobey the safety notes.
- 🔥 Dangerous (be careful of highly dangerous)
- ⚠ Warning (be careful of mid dangerous)
- ⚠ Caution (slight dangerous should be noted)
- 1) Keep the keyboard away from sharp objects.
- 2) Do not Microwave the keyboard.
- 3) Do not place heavy object on the keyboard.
- 4) Do not force or distorted the keyboard.
- 5) Keep away from oil, chemical or any other organic liquid.
