

Model: CH-C09E(gray)

EUT Housing and Board View 1	 A photograph showing the back of a black electronic device (EUT) and its internal battery compartment. The device is placed on a blue surface next to a black ruler with white markings. The ruler is oriented vertically, showing measurements from 0 to 100 mm. The device's back cover is on the right, and the battery compartment is on the left. The battery compartment contains six AA batteries. The device has a small 'UP' arrow and a blue button on the back cover.
EUT Housing and Board View 2	 A photograph showing the front of a black electronic device (EUT) and its internal battery compartment. The device is placed on a blue surface next to a black ruler with white markings. The ruler is oriented vertically, showing measurements from 0 to 100 mm. The device's front cover is on the right, and the battery compartment is on the left. The battery compartment contains six AA batteries. The device has a small 'UP' arrow and a blue button on the front cover.

Solder Board-Component View 1	 A photograph of a small, square, black printed circuit board (PCB) component. The component is densely populated with various electronic components, including a central integrated circuit (IC), several resistors, and capacitors. It is placed on a blue fabric surface next to a black L-shaped ruler. The ruler has white markings in millimeters and centimeters, with the component positioned near the 100mm mark on both axes.
Solder Board-Component View 2	 A photograph of the same PCB component from a different angle. This view shows the underside of the component, revealing the solder joints and the components on the reverse side. The component is again placed on a blue fabric surface next to a black L-shaped ruler, with the same markings visible.

Solder Board-Component View 3	 A photograph of a circular solder board component, labeled 'A9090', placed on a blue background. The component is positioned next to a black L-shaped ruler with white markings in millimeters. The ruler's vertical scale ranges from 0 to 100 mm, and the horizontal scale ranges from 0 to 100 mm. The component is a small, dark, circular board with several solder points and a central hole.
Solder Board-Component View 4	 A photograph of the same circular solder board component, labeled 'A9090', from a different angle. It is placed on a blue background next to the same black L-shaped ruler. The ruler's vertical scale ranges from 0 to 100 mm, and the horizontal scale ranges from 0 to 100 mm. This view shows the component's profile and the arrangement of solder points around its circumference.
