

Model: CH-C09D(white)

EUT Housing and Board View 1	 A photograph showing the internal components of a device, specifically the EUT housing and board. The components are laid out on a blue surface next to a black ruler with white markings. The ruler is oriented vertically on the left and horizontally at the bottom. The components are white and silver, with various electronic components visible on the board.
EUT Housing and Board View 2	 A photograph showing the internal components of a device, specifically the EUT housing and board. The components are laid out on a blue surface next to a black ruler with white markings. The ruler is oriented vertically on the left and horizontally at the bottom. The components are white and silver, with various electronic components visible on the board.

Solder Board-Component View 1	 A photograph of a small, rectangular electronic component, likely a solder board, placed on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is oriented vertically, with its longer side parallel to the ruler's 0-100 mm scale.
Solder Board-Component View 2	 A photograph of the same electronic component from a different angle, showing its top surface. It is placed on the same blue textured surface next to the same black ruler. The component is oriented horizontally, with its longer side parallel to the ruler's 0-100 mm scale. The top surface features a central square component, possibly a microcontroller or sensor, and several smaller components and solder joints.

Solder Board-Component View 3	 A photograph of a small, circular, ring-shaped electronic component, likely a surface-mount device, resting on a blue textured surface. The component has a dark, possibly black or dark brown, body with several small, light-colored rectangular markings or components on its outer edge. A black L-shaped ruler is placed next to the component for scale. The ruler has white markings in millimeters and centimeters. The component is positioned near the 10 mm mark on the horizontal ruler and the 20 mm mark on the vertical ruler.
Solder Board-Component View 4	 A photograph of the same small, circular, ring-shaped electronic component from a different perspective. The component is dark with some visible internal structure and small components on its surface. A black L-shaped ruler is placed next to it for scale, similar to the one in View 3. The component is positioned near the 10 mm mark on the horizontal ruler and the 20 mm mark on the vertical ruler.
