NOTE: RCA adapter is not included, recommend AUX Port.

9

Charging

A: TV USB

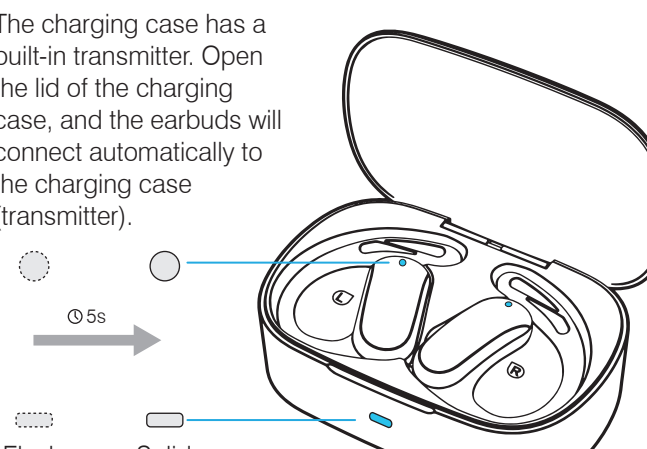

B: USB Adapter

Charge via TV's USB port (A) or a USB adapter (B, USB adapter not included)

10

Pairing Automatically

The charging case has a built-in transmitter. Open the lid of the charging case, and the earbuds will connect automatically to the charging case (transmitter).

NOTE: No Bluetooth function! Only for TV watching.
If the connection fails, you can place the earbuds back into the charging case, close the cover, wait for 5 seconds, and then open the lid again, they will connect automatically.

OPTION 1: OPTICAL Port

Recommend

OPTICAL

Optical Cable

OPT/OUT

NOTE: Go to TV settings if connect via the OPTICAL Port.
Most TVs audio output only one digital output at a time, so if TV's HDMI ARC port is in use, the OPTICAL port may be disabled.
You can either unplug the HDMI ARC or try connecting via AUX / RCA.

7

TV Settings for OPTICAL Port

Go to TV setting if connect via the OPTICAL Port

TV Settings > Sound > Audio Out > Optical / Digital Out / External Speaker

TV Settings > Sound > Expert Settings > Digital Output Audio Format > PMC / Stereo, or you can turn off Dolby

NOTE: If you still can't hear anything through the headphone, You can try AUX / RCA Port

8

Factory RESET

If the connection fails or the device doesn't work, please try performing a factory reset

Place the earbuds back into the charging case, close the lid, and use a thin needle to press the RESET hole once. Wait until the white light on the charging case turns off, then open the lid. The indicator lights on both the earbuds and the charging case will flash for approximately 5 seconds, after which a steady white light will appear—this confirms that the factory reset has been successfully completed.

13

Trouble Shooting

1. No sound from the headphones?

First, check if the charging case and headphones have sufficient battery power. Place the headphones back into the charging case—if both the headphones and the charging case light up with a white light, it indicates they have enough power. Then, check if the optical fiber is properly connected to the TV and if the TV is set up correctly (refer to the settings on Page 8). Use the TV remote control to turn up the TV volume, and at the same time, touch the right headphone to increase the headphone volume.

2. How to control the volume?

Touch the left headphone to decrease the volume, and touch the right headphone to increase the volume.

3. What to do if the headphones fail to connect to the charging case (transmitter)?

Place the headphones back into the charging case, close the lid, wait for 5 seconds, then open the lid. If the indicator lights of the headphones and the charging case first flash for 5 seconds and then stay on steadily, it means the automatic connection is successful. If the connection still fails, please reset the device to its factory settings (refer to the factory reset instructions on Page 13).

4. Is it better to charge with a USB charger or the TV's USB port?

It is recommended to power the charging case via the TV's USB port. If the TV does not have a USB port, you can use a 5V 1A USB charger for power supply.
