ONE

Product team

Aijia life、Xixiyuezi recommended together to buy ready to use Bionic vitro placenta infant care capsule.

With love & responsibility, Hulubao R&D team with Science and technology、parenting experts from USA、Dubai、HK explore and study nearly one million newborns from all over the world, through data analysis to get laws of growth and psychological development needs of newborns, after five years, Hulubao research and design team to develop professional care for newborn bionic placenta environment intelligent “infant care capsule”. Applicable age 0-90 day.

TWO

Function introduction

Function Page:

This full intelligent infant care capsule with very humanization and intelligence Hulubao baby artifacts, which let all young parents loved entire world, has below magical characteristics?

Shape-changeable skin-friendly mattress

The bed simulation modeling mom placenta radian, flattening on a daily basis; The mattress is made of high-quality non-toxic skin-like materials, soft and comfortable . Baby lying inside is very comfortable & reducing the appease frequency significantly, like mom' s embrace. Patented technology, keep the mattress dry & no odor effectively. Cotton cloth, breathable and comfortable, not muggy, not contain formaldehyde and f-luorescer to care of baby' s delicate skin; Can be anti-mite, prevent bedwetting, vomiting, spilled milk, do not decrease the effect with the number of cleanings. It past the international environmental Textile Association certification and Intertek certification.

Unique vibration-absorbing base

Infant care capsule is divided into an upper and a lower part that are hinged together. Spiral fully automated height adjust function to ensure smooth lift; The capsule body is with graded shock function. giving the baby a quiet and comfy sleep environment.

Swinging feature of smart mattress

The mattress swinging simulation of the placenta amniotic fluid environment, which can help to coax baby sleep and promote the baby to sleep. The bedstead remains still to secure the bed. Swing designed with the advantages of moderate power, natural swing, no noise, safety etc.

Intelligence-inspiring music play

The capsule is provided with intelligence-inspiring music-chord tone and the sound, Combined with mother placental sound, brain and immune music can help soothe newborns, According to the number of days the baby's growth, the placental sound will gradually decrease, the brain and immune music will increase, which to promote the balanced development of the body. Dad and Mom can also download the brain development of the baby Alfa music, songs, stories etc., through the U disk, SD card or memory card inserted into the phone to play. According to the needs of the environment, adjust the volume.

Built-in non-contact sonar heartbeat detection

The bed is provided with a built-in detector, which can give out pre-warning according to the heartbeat frequency of babies. When the heartbeat frequency is lower than the standard value, the nursery bed will automatically give out warning which is very safe and practical. Using high-tech DC power supply technology, the voltage is only 0.2 volts through the power line frequency conversion which is equivalent to two small battery voltage.

Body Temperature Pre-warning function

With built-in IR temperature sensors to predict the baby's body temperature. It has pre-notice function upon temperature rise. High fever early to know early treatment, the baby will be more healthier.

Electronic weighing function

When you start to use the nursery bed, it will automatically record newborn's weight everyday.

Bed camera remote monitoring

Let your baby feel the love of family with zero distance.

Activated carbon air film

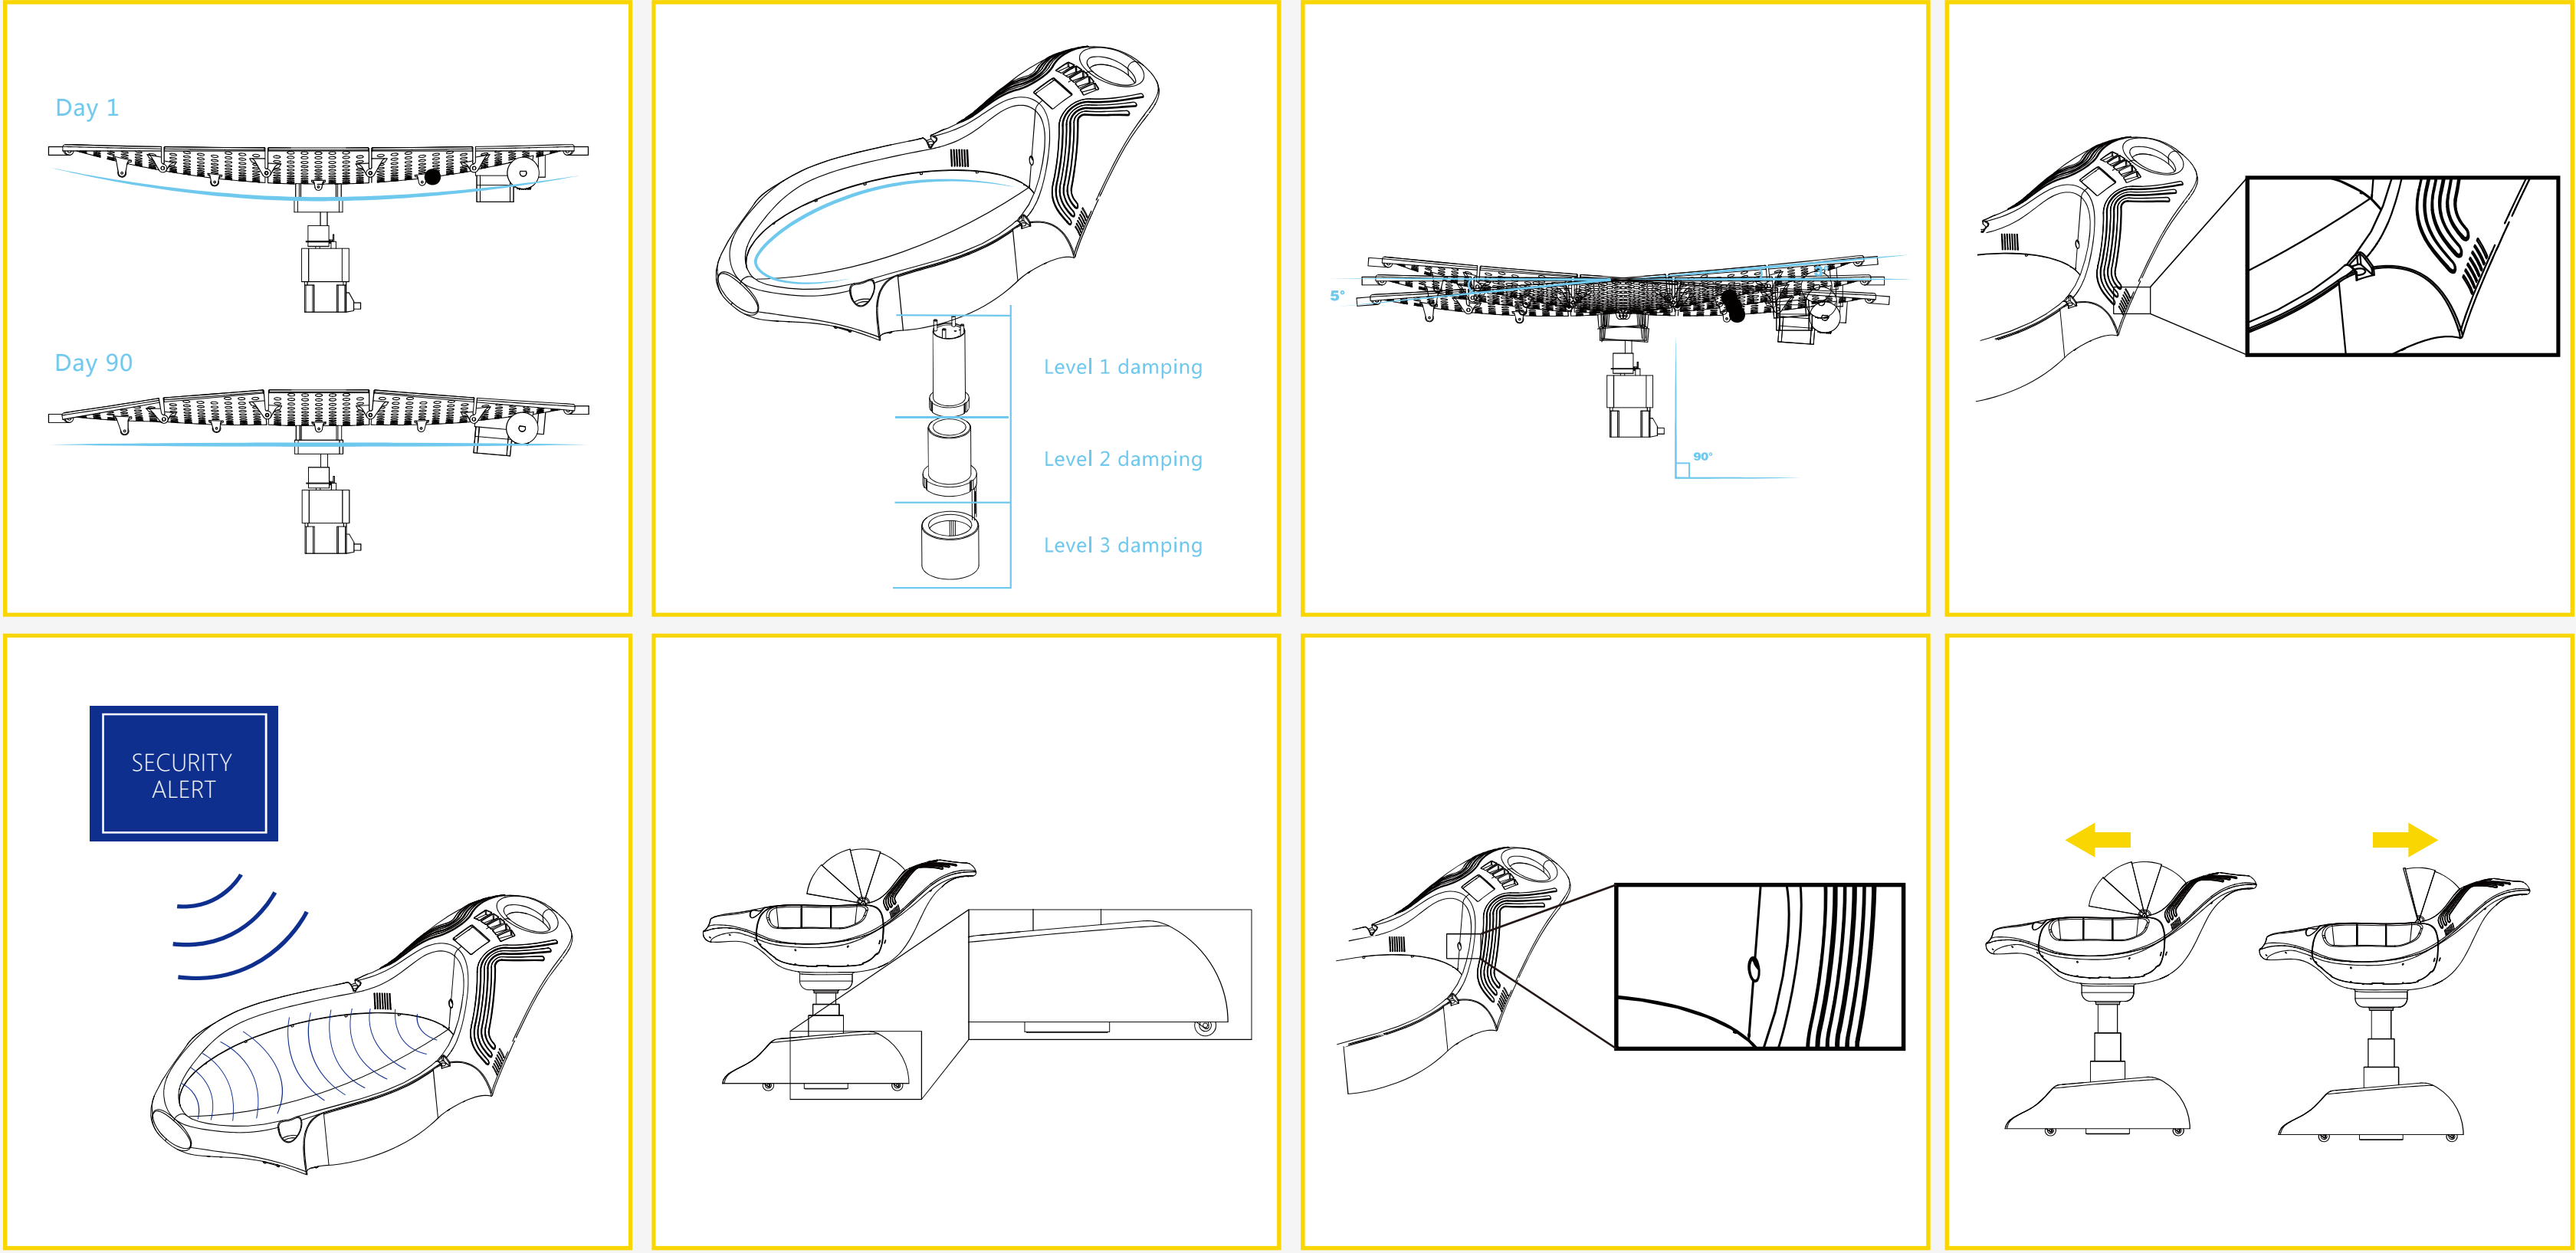

Purify the air inside the bed to ensure the baby sleep in the qualified air environment.

Retractable shading blade

Glare shield to protect the baby's vision

Wifi remote function

By downloading intelligent application app, so that parents manipulate the smart infant care capsule easily at any time and anywhere.

FCC Warning:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Industry Canada's licence-exempt RSSs. Operation is subject to the following two conditions:

(1) This device may not cause interference; and

(2) This device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme aux CNR exemptes de licence d'Industrie Canada . Son fonctionnement est soumis aux deux conditions suivantes :

(1) Ce dispositif ne peut causer d'interférences ; et

(2) Ce dispositif doit accepter toute interférence , y compris les interférences qui peuvent causer un mauvais fonctionnement de l'appareil.
