This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

LED Indicators:

- This indicator is activated when the Bluetooth Link is active. When the Bluetooth Link is active, the LED indicator will blink 14 times per second.

- The LED indicator will blink slowly when the Bluetooth Link is not active.

- The LED indicator will turn on when the Bluetooth Link is active and the device has been paired with a device.

- The LED indicator will turn off when the Bluetooth Link is inactive.

- The LED indicator will turn on when the Bluetooth Link is active and the device has been paired with a device.

- The LED indicator will turn off when the Bluetooth Link is inactive.

- The LED indicator will turn on when the Bluetooth Link is active and the device has been paired with a device.

- The LED indicator will turn off when the Bluetooth Link is inactive.

- The LED indicator will turn on when the Bluetooth Link is active and the device has been paired with a device.

- The LED indicator will turn off when the Bluetooth Link is inactive.

- The LED indicator will turn on when the Bluetooth Link is active and the device has been paired with a device.

- The LED indicator will turn off when the Bluetooth Link is inactive.

- The LED indicator will turn on when the Bluetooth Link is active and the device has been paired with a device.
