

i. Marketing:

The AR41004 US is a B2B device only. It is neither marketed, nor sold to retail or general public, and it is not traded by mail or e-commerce order. The AR41004 US is targeted to City operators, utility companies, hardware manufacturers, system integrators and professional developers having skilled personnel to design and deploy specific field projects and B2B applications.

ii. Installation:

Installation of AR41004 US is restricted to professional personnel (the so-called “skilled people” in safety standards). Appropriate instructions and recommendations are provided in the document “DOC-INS-0059 PE Smart Gateway Neptune US Installation manual”. The EUT is typically installed outside the reach of general public, ie. at the top of street light poles, without any possible access from unauthorized people.

iii. Application:

Use of AR41004 US is restricted to professional personnel employed by City operators, utility companies, hardware manufacturers, system integrators and professional developers. The AR41004 US can neither be operated, nor used by general public, as clearly stated in all product documentation and marketing-related activities. For further information, B2B users are invited to refer to the document “DOC-DAT-0007 PE Smart Gateway Neptune US Datasheet”
