Labelling Permission request for FCC Certification

FCC ID: 2AKXF-ALB090
Model number: ALRM002

We are writing to request permission to place the FCC ID in the user manual for our device.

The product in question is a compact communication module with dimensions of approximately 11 mm × 11 mm. Due to the limited available surface area, including the FCC ID on the physical label would require a font size smaller than 4 points, rendering the information unreadable. The RF module will not be sold to the general public. It will be integrated exclusively into our own host products and will not be marketed or distributed as a standalone module device.

For this reason, we respectfully request approval to include the required labelling information in the user documentation instead of on the device itself.

Attached to this request are the labelling details, including dimensional specifications and a photo exhibit of the product.

Thank you for your consideration.

Sincerely,

Kevin Wright
