

Label Location Justification Letter

Subject: FCC and IC Label Location

To Whom It May Concern,

With regards to the label location for eBrief Tag (1.60) FCCID: 2AL2U-ET2210160 and IC: 22807-ET2210160.

The device being certified is a paper thin, small tag transmitter that is embedded within a liner and/or adult diaper. The tag is very small and is not visible by the user before, during, or after use (and subsequent disposal). Our plan is to provide the ID's in 2 locations, one on the bulk packages of the supplied liners as well as electronically in the about system information tab of our eBrief caretaker application. Among the exhibits with this filing will be label samples and instructions how to electronically access the IDs.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian Peace", with a long horizontal flourish extending to the right.

Brian Peace
