

The image shows the front cover of a Thomson Digital Photo Frame User Manual. The cover is divided into two main vertical sections by a thin black line. The left section is light gray and features the Thomson logo in red, italicized, uppercase letters, centered vertically. The right section is white and contains the following text: the Thomson logo in red, italicized, uppercase letters at the top; the model number 'Model TDF-1001P' in black, centered; the product name 'Digital Photo Frame' in a large, bold, black sans-serif font, centered; and the subtitle 'User Manual' in a smaller, black sans-serif font, centered below the product name. At the bottom right of the white section, the text 'ENDEFRRESIT/日本語' is printed in a small, black sans-serif font.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.ct.

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.
