

Installation Guide

Version: V1.0

FCC Warning
This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- Radiation Exposure Statement
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Step 2

Internet settings

Connect the phone (or computer) to the router's "wireless-XXXX" and then set it up as following steps:
(XXXX represents the last 4 digits of the MAC address, or see the sticker on the back of the router to obtain the wireless network name)

Two access methods commonly used in home network:

I Open the browser and enter **192.168.16.1**
I See the sticker on the back of the router for the login password

I If "dynamic acquisition" is detected automatically, click "Next Step" directly

I If "Broadband dialing" is detected automatically, please enter the operator provided broadband account and password, then click "Next Step"

I Set the wireless name and password, and then click "Next Step"

I After the countdown, reconnect the wireless (when connecting, enter Wi Fi password shown on this page)

Led lights function description

System light (single light and two-colors)

Red light steady on	Powered on
Red light off	System is starting
Red light flashes	Without network
Blue or green light is steady on	Network connected
