LB-LINK®

Quick Installation Guide

Wireless Adapter

Version: 1.0

1. Hardware Connection

2. Driver installation

*The driver only supports windows10/windows11 system

- a. After the hardware connection, the computer will automatically pop up in installation window. Click the CD drive to open the CD drive window and click to run "WifiAutoInstallSetup.exe".

- ! If it does not automatically pop up, please Go to "My Computer" or "This PC" on the desktop and double-click the "CD drive of the B-LINK".
- b. On the installation screen, click Install to install the driver. Wait for about one minute.

- ! Before installing the driver, disable the firewall or other security protection software to prevent installation.

3. Wireless reception

Click the icon [] in the lower right corner of the desktop to select the wireless network name, and click Connect. If Connected is displayed, the network is connected successfully.

Troubleshooting

If you have problems during the installation, please refer to the following online FAQs.

1. If you can't install the driver successfully, disable the antivirus software and firewall, then try again.
2. Try another USB port.
3. Confirm whether the computer has installed similar driver. If so, please delete the installed driver and re-install the correct driver.
4. Avoid using the extension line to connect the USB Adapter, which may cause insufficient power supply of the USB Adapter and make the computer unable to recognize the USB Adapter.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
 - (2) this device must accept any interference received, including interference that may cause undesired operation.
- This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC ID: 2AL6KBL-WTN5400E

The nameplate is shown in the instruction manual.

This Device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of issue. Device has also been tested against this SAR limit.
