Learn about your portable translation device hardware and how to get started using your new Travis.

Appearance

LCD: 1.3 inch display

Control panel: Tap the arrow buttons to navigate the interface.

Power button: Press and hold to turn the device on or off.

Sim card slot: Insert the Micro Sim card for 3G Internet.

Headset jack: Connect a headset (optional, not included).

USB charger port: Connect the USB charger cable (included)

Microphone: Two microphones with noise-cancellation

Speaker: Plays translated messages and other sounds.

Reboot button: Press and hold to reboot the device.

Specifications

Processor	Quad-Core, 1.3Ghz ARM7
Operating System	TravisOS
ROM	8G
RAM	1G
Display Screen	1.3 inch Display, 320 x 320 pixels
Capacitive Touch Panel	Gesture Control, 5 Touch Buttons, Instant On
Wireless	Bluetooth, Wi-Fi: 802.11b/g/n, 3G: WCDMA (850/1900/2100MHz)
Microphones	Built-in Dual Microphones with noise-cancellation
Audio	Built-in Boosted Dynamic Speakers External Audio / Microphone supported: wired- 3.5mm audio jack; wireless Bluetooth.
Battery	2000mAh
Indicator light	Red, Blue, Green
Dimensions	110 x 60 x 16 mm, 90 grams

Safety Instruction

Important Battery Information

Battery: Do not attempt to replace the built-in battery yourself, you may damage the battery, which could cause overheating and injury.

Charging: Charging the device with the included USB cable and power adaptor.

Note: To ensure compatibility, only use accessories recommended by the manufacturer.

Safety and Handling Information

Read these instructions before operation.

Keep these instructions for future reference.

Follow all instructions for installation, use and maintenance of the device.

To avoid drop, place the device on a flat and hard surface.

To clean the device, disconnect power first..

Do not expose the device to any liquid. Whenever your device gets wet, dry it with a clean, soft cloth.

When the device is suddenly moved from cold to warm surroundings, condensation may form in the housing of the device. Before use, leave the device in the warm environment until the moisture evaporates.

Keep the device away from heat sources, such as a radiator, heater, oven, amplifier, naked flames or direct sunlight.

No naked flame sources, such as lighted candles, should be placed on the apparatus.

Never block any ventilation openings. Install in accordance with the manufacture's instruction.

- Do not expose the device to sand or dust, or cover it with items, such as newspapers, cloths, or curtains.
- Do not operate the device in an enclosed cabinet. Leave sufficient free space around the device for adequate ventilation.

Do not attempt to repair or service the device yourself. Opening or removing the cabinet may expose you to electric shock, and other hazards.

If repair is required, contact your dealer and refer all servicing to qualified service personnel.

Do not use the device if any abnormality occurs. If any smoke becomes apparent, contact your dealer immediately. Do not try to repair the device yourself.

Avoid using dropped or damaged appliances. If the device is dropped and the housing is damaged, the internal components may not function normally. Stop use and contact your dealer for repair. Continued use of the device may cause fire or electric shock. To reduce the risk of electric shock, do not touch any connector with wet hands.

Never remove the housing of the device.

Never lubricate any part of the device.

Never place the device on top of any other electrical equipment.

Warning: To reduce the risk of electric shock, do not remove cover (or black) as there are no user-serviceable parts inside.

Recycling

Packing

Observe the local regulations for how to dispose of the package materials.

Instructions for users on removal, recycling and disposal of used batteries

For products with a built-in battery that lasts for the lifetime of the product, removal may not be possible for the user. In this case, recycling or recovery centers handle the dismantling of the product and the removal of the battery, this procedure must be performed by authorized service centers. In the European Union and other locations, it is illegal to dispose of any battery with household trash. All batteries must be disposed of in an environmentally sound manner. Contact your local waste-management officials for information regarding the environmentally sound collection, recycling and disposal of used batteries.

Warning: Danger of explosion if battery is incorrectly replaced. To ensure risk of fire or burns, do not disassemble, crush, puncture, short external contacts, expose to temperature above 60 °C, or disposal of in fire or water. Replace only with specified batteries.

The symbol indicating “separate collection” for all batteries and accumulators shall be the crossed-out wheeled bin, shown below:

Notice

FCC compliance statement

FCC ID: 2AL6P-TT001

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF exposure information (SAR)

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S.

Government.

The exposure standard for wireless devices employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg.

Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value.

While there may be differences between the SAR levels of various devices and at various positions, they all meet the government requirements.

The FCC has granted an Equipment Authorization for this model device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model device is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/ea/fccid> after searching on the FCC ID for your device, which can be found on the back of the device.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: (FCC ID: 2AL6P-TT001) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification 0.64 W/Kg (1g) for Body-worn; 0.72 W/Kg (1g) for Hotspot;.

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 5mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
