

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and
Board View 1**

**Solder
Board-Component
View 1**

Solder Board-Component View 2	 A photograph of a rectangular printed circuit board (PCB) populated with numerous small, square surface-mount components, likely LEDs. The board is positioned horizontally against a blue textured background. A black L-shaped ruler is placed to the left and below the board for scale. The ruler shows measurements in millimeters, with the horizontal scale reaching 200 mm and the vertical scale reaching 80 mm.
Solder Board-Component View 3	 A photograph of a curved printed circuit board (PCB) with a green solder mask. The board is populated with small components and has a long, thin, flexible cable or ribbon attached to one end. It is positioned against a blue textured background. A black L-shaped ruler is placed to the left and below the board for scale. The ruler shows measurements in millimeters, with the horizontal scale reaching 200 mm and the vertical scale reaching 60 mm.

Solder Board-Component View 4	 A photograph of a curved green printed circuit board (PCB) component. The board is positioned against a blue background with a black L-shaped ruler for scale. The ruler has markings in millimeters (0 to 100 mm) and centimeters (0 to 20 cm). The PCB is curved, with several small electronic components (resistors and capacitors) soldered onto it. A white cable is connected to one end of the board.
Solder Board-Component View 5	 A photograph of a rectangular black printed circuit board (PCB) component. The board is positioned against a blue background with a black L-shaped ruler for scale. The ruler has markings in millimeters (0 to 100 mm) and centimeters (0 to 20 cm). The PCB is rectangular, with several small electronic components (resistors and capacitors) soldered onto it. A white cable is connected to one end of the board.
