

FLS-PRO-BT Specifications

• Specifications

Bluetooth Version: 4.1 (CSR8645)

Supported Bluetooth profiles: A2DP v1.2, AVRCP v1.4,
HFP v1.6, HSP v1.2

Frequency range: 2402MHz – 2480MHz

Transmission range: up to 10 m

Power: lithium-ion polymer battery,
4.2 V / 170 mAh (rechargeable)

USB to micro USB cable

Color: black

Size : 41*28mm

• Battery status

Charge time	≤2 hours
Talk time	≥10 hours
Music playback time	≥10 hours
Standby time	≥120 hours

• Led Status

CHARGE	Flashing Blue	Low battery
	Blue (when plugged in)	Charging
	White (while plugged in)	Fully charged
LED	Quick Blue/White Flashing	Pairing mode
	Slow White Flashing	Connected
	White	Connected

• Button functions

Button	Function
Power / Pair Play / pause answer / end call Reject call Redial last number	Long press the button while off (2 seconds) – power on
	Long press the button while on (5 seconds) – power off
	Press Vol- and VOL+ at the same time (2 seconds) – pairing
	Short press (while playing music) – play / pause
	Short press (while calling) – answer / end call
	Long press (while calling, 2 seconds) – reject call
Volume +/-/Previous	Short press twice – voice dial
	Press once to go to increase volume While Calling and playing music
Volume -/Next	Press and hold to previous track while playing music
	Press once to go to decrease volume While Calling and playing music
Volume +/-/Previous	Press and hold to next track while playing music
	Press and hold to next track while playing music

- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions :
 - (1) this device may not cause harmful interference, and
 - (2) this device must accept any interference received, including interference that may cause undesired operation

- This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with FCC's radiation exposure limits set forth for an uncontrolled environment .

- RECYCLING

This product bears the selective sorting symbol for Waste electrical and electronic equipment (WEEE).

This means that this product to European directive 2012/19/EU in order to be recycled or dismantled to be recycled or dismantled to minimize its impact on the environment

User has the choice to give his product to a competent recycling organization or to the retailer when he buys a new electrical or electronic equipment .

- DC voltage
