

FCC Attestation Letter - Antenna Configuration

Date 06/29/2026

Subject: Attestation Regarding Antenna Configuration

To Whom It May Concern,

We hereby confirm that the antenna used in the Computer Board is **not** one of the antenna configurations included in the original FCC certification of the Murata wireless module (FCC ID: **VPYLBEE5PL2DL**).

The antenna installed on the Computer Board differs from the antennas listed under the original Murata certification filing. Therefore, the antenna configuration cannot be considered covered by the original module certification.

The FCC certification of the Computer Board has been performed considering the actual antenna configuration implemented on the product, and the applicable regulatory requirements have been evaluated accordingly.

Sincerely,

Alessandro Pali
