

Device FCC label statement

1) Location

The FCC label is permanently laser etched on the upper cover of the device. The upper cover can't be removed from the device because several key components are attached to the interior side of it, otherwise the device won't work normally.

2) Size

The label size is about 14mm * 2mm.

FCC ID: 2AM3ESHS1

3) Content

The laser etching sample is shown as below.

FCC ID: 2AM3ESHS1

We are unable to put the Statement B on the case because it is highly possible the marks will fall off the metal surface, which is not in line with FCC's requirement about a permanent mark. Therefore, the Statement B will be printed in the user's manual.
