Re: 802.11d Attestation

Attn:
FCC Office of Engineering
and Technology / UL
Verification Services TCB

FCC ID: 2AM5N-ML2M1

To Whom It May Concern:

The WLAN transmitter uses the Qualcomm geolocation mechanism approved by FCC OET via KDB inquiry. We do not modify this mechanism and it is implemented as described in the Qualcomm supporting documents for the KDB. We understand that it is the grantee's responsibility to correctly implement the algorithm to ensure compliance with FCC's rules.

Best Regards

A handwritten signature in black ink, appearing to read 'Jonathan Reeves', with a large, stylized initial 'J'.

Jonathan Reeves
Sr. Director, Regulatory/Compliance/Quality Systems.
