2.Adding camera

Turn on the power, wait for the camera to start, when you hear a “Waiting for add”, Indicates that the camera enters the waiting configuration state.

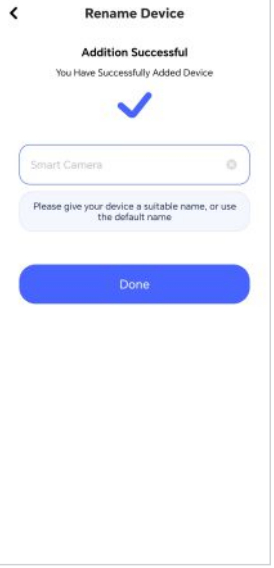

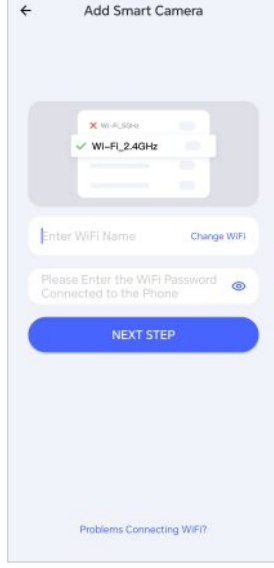

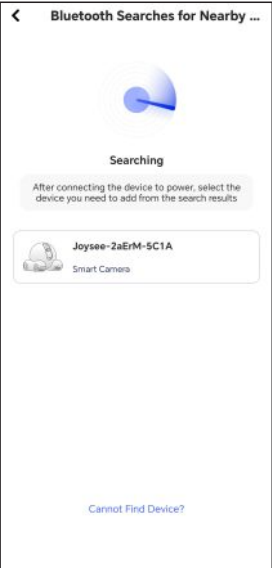

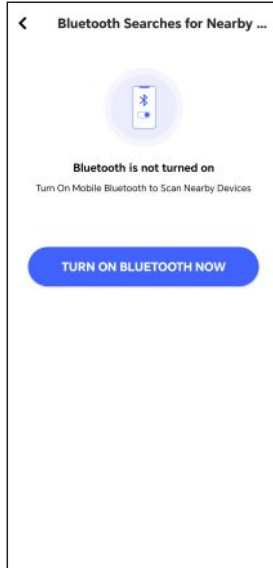

Open the app and click “Add Device”.

Add Device Method One: Scan the QR code on the device.

Add Device Method Two: Click “ADD BY Bluetooth”, enable Bluetooth, then find the robot device in the search results.

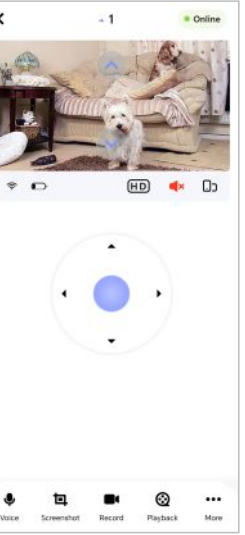

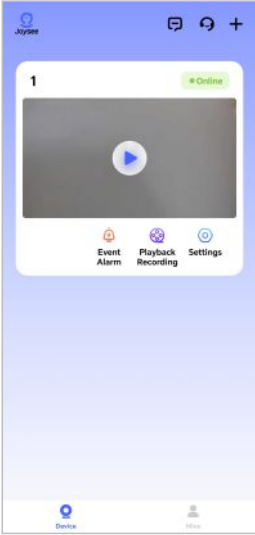

Fill in the camera name.

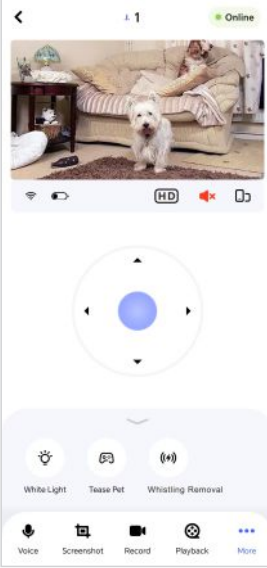

Operational guidance

Enter the APP main interface to remotely control the camera .

Click on the up and down arrows in the view window to adjust the camera's angle of view, and click on the arrow keys below to steer the camera.

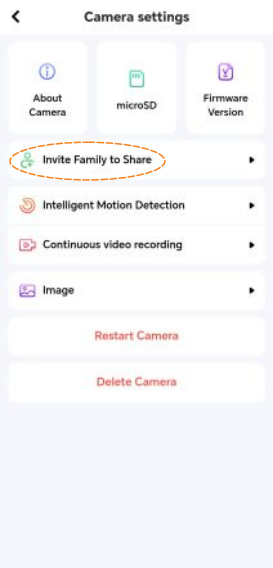

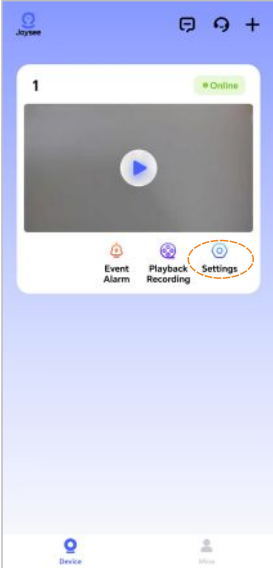

The main interface functions include voice, screenshot, video recording, playback, and pet teasing.

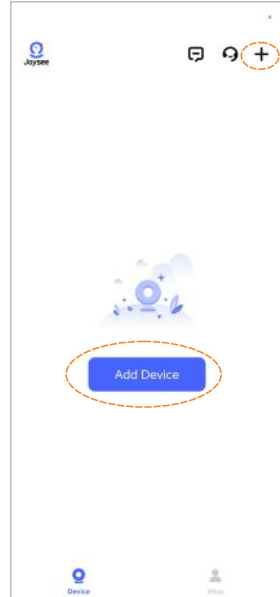

Share with others

Click settings in the main interface.

Click invite family to share.

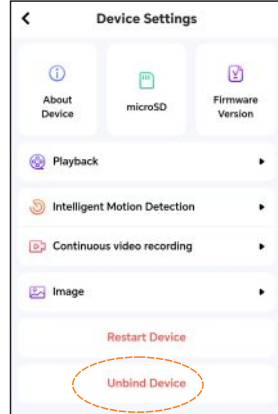

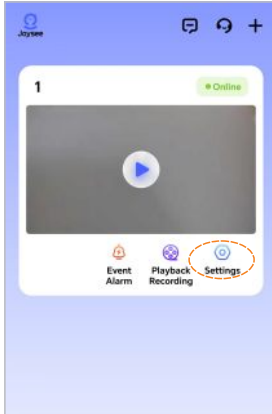

3.Open the APP on the mobile phone of the shared user, click the main interface to add the device or click the "+" in the upper right corner to scan the QR code.

Reset

Turn on the device's power, hold down the reset button until you hear "Reset completed and restarting", indicating a successful reset.

While the device is in a connected state, unbind the device through the mobile application, and the robot will be restored to its factory settings.

*The interface is based on the latest version of the app, and this manual is for reference only.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

Warning:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

measures:

Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
