

# Tap2iD™ Verifier Setup Guide

## Installation

1. Open the stand provided in the kit

2. Place the Tap2iD Verifier on the stand. Ensure the LED light faces the bottom.

3. Connect the verifier to a power supply. You will notice the red LED at the bottom and screen turn on.

### Note:

1. Place the device in a convenient location for both you to easily authenticate mobile or physical IDs, such as near the point of sale (POS) or entry points.
2. Ensure the device is connected to a continuous power supply. Alternatively, you can use a portable power source, such as a power bank.
3. For optimal performance, place the device and stand on a flat, stable surface in a well-lit area.

## Connect to Wi-Fi

1. Open Tap2iD Mobile app from your phone

2. Go to 'Settings' and click on 'Tap2iD Configuration'

3. Enter your Wi-Fi Name/SSID (case-sensitive)

4. Enter your Wi-Fi password

5. Scan the QR-code generated to connect the device to Wi-Fi

### Note:

1. The device connects only to private and secure Wi-Fi networks.
2. Connecting to Wi-Fi ensures your transactions are logged (no PII stored).
3. If the device does not connect to Wi-Fi
  - Double-check that the Wi-Fi name and password are entered correctly.
  - Unplug the device, wait a moment, and plug it back in.
  - If the issue persists, contact us for support: [support@credenceid.com](mailto:support@credenceid.com) or +15102191442

Please include below FCC warning statements;

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
