

BASSCASE

QUICK START GUIDE

PLAYING MUSIC/VIDEO: Move the switch to the middle position which has a Bluetooth symbol. The left LED will show a blue blinking light to signal that the Bluetooth is on. Now from your phone or other device make sure that Bluetooth is on and look for "BASSCASE" and connect to it.

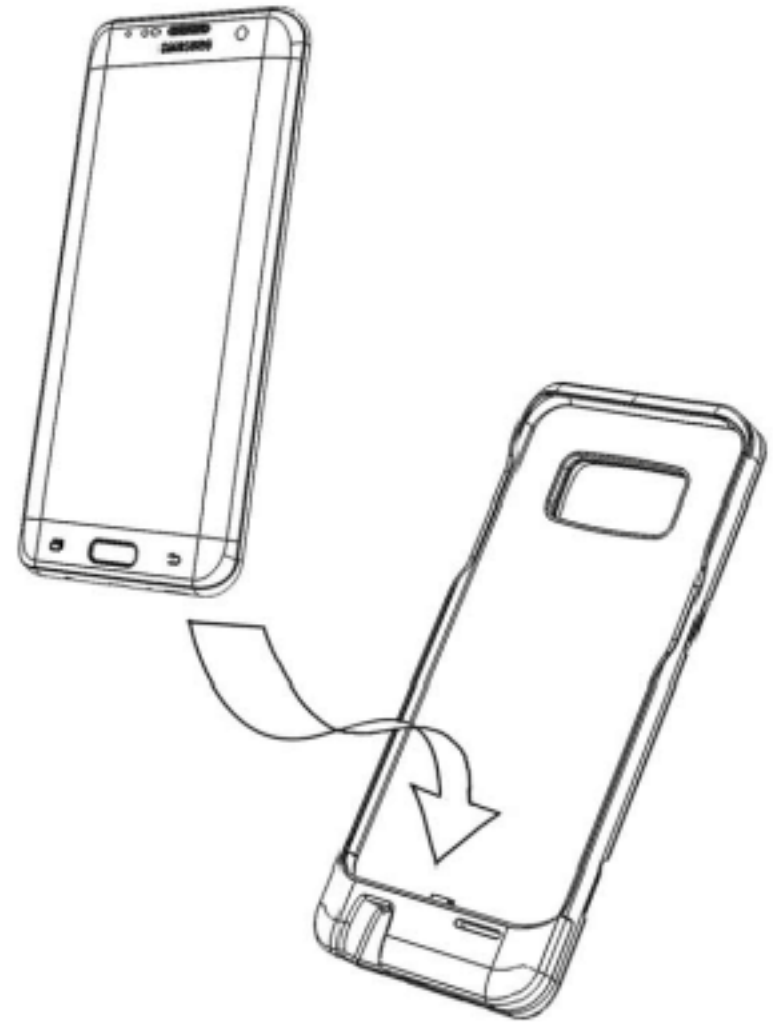

Allow a few seconds to pair. Now any audio you play will come through the BassCase speakers.

To adjust volume use the volume controls on your device.

TO CHARGE: To charge your phone when plugged in or while on the go move the switch to the far right position. The switch must be in the "charge" position for your phone to charge. It also allows the BassCase battery to transfer its power to your phone while on-the-go. The BassCase battery will charge no matter what position the switch is in which allows you to use BassCase as a stand alone speaker and play music while continuously charging.

Note:

The 4 LED's will approximate the battery level remaining in BassCase.

FULLY CHARGE BASSCASE BEFORE USE

- 1) Align micro USB port on bottom of phone with micro USB plug on BassCase.
