

Difference Statement

Model: Pocket WiFi V3.0, Pocket WiFi V3.0 -P, Pocket WiFi V3.0 -E

Only the antenna gain of the three models is different, and the internal circuit boards are the same. The model Pocket WiFi V3.0 is Built-in antenna, and the antenna gain is 3.63 dBi. The model Pocket WiFi V3.0-P is a Whip antenna with an antenna gain of 3.0 dBi. Model Pocket WiFi V3.0-E is a Suction cup antenna with an antenna gain of 3.5 dBi. So we choose "Pocket WiFi V3.0" for RF test.
