

Unfold size: 170X111MM Material: 80G Writing paper, folded back and forth Size: 85X111MM

WARNING! IMPORTANT CARE AND SAFEGUARDS

Failure to follow the safety instructions can lead to fire, electrical shock, personal injury or property damage and damage to this product.

- Do not use this charging pad for anything other than its intended use
- This product is not intended charge batteries or other devices
- If you have an electrical device, such as a pacemaker, consult a physician before using this product
- Always place the charging pad on a sturdy and level surface
- Do not place magnetic cards or similar items near this product
- Keep all foreign objects, small metal pieces and debris away from charging surfaces at all times
- Make sure charging surfaces are completely clear prior to use and at all times
- Always use the specified power source and voltage
- Do not use a voltage converter / travel adapter
- This product contains small parts and is not suitable for children
- Keep charging pad away from heat sources and direct sunlight
- Do not expose this product to rain, water or excessive humidity
- If the charging pad becomes wet, immediately unplug it from the power source
- Always use this product in operating temperatures of 32°F (0°C) 95°F (35°C)
- Do not handle the charging pad, USB power cord or power source with wet hands
- Do not let dust or other things accumulate on charging pad or power cord
- Do not use the charging pad if it has been dropped or damaged in any way
- Never take this device apart and always get repaired by a qualified technician
- Always unplug the charging pad when not in use for a long period of time

CAUTION! Device must have Qi enabled charging. Check with manufacturer for compatibility.

Never use the charger to charge smartphones with metal cases or metal plates between the case and the phone. Some additional non-metal protective cases may also interfere with proper charging.

The charger, phone and accessories will feel warm during or after charging.

FCC Disclaimer: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER AUTHORITY TO OPERATE THE EQUIPMENT.

Wireless Charging Pad

Product Instruction Manual

Please read carefully prior to use.

Plug in any USB power source.
For faster charging speeds, combine with USB-C PD 3.0 PPS power source.
USB power source not included.

Please call customer service at 1-800-254-0111 with any questions

Specifications

Input: 5V-21V = 2A PPS

Output: 5W-25W

Charging Standard: Qi™ Wireless

Charging Distance: ≤5mm

Power Port: USB Type-C

Power Cord: 3FT (1M)

MagSafe® Compatible Wireless Charging Pad

USB Power Cord

USB-C Power Port

Power Indicator Light

Universal Magnetic Ring

Unplug wireless charging pad and periodically wipe clean with soft cloth. Never use abrasive cleaning agents or get wet.

Proper Charge Positioning

Connecting Power

1. Connect USB cable to USB-C port on side of wireless charging pad.
2. Connect to USB power source (not included). For faster charging speeds, connect to USB power source with USB-C PD 3.0 that supports programmable power supply (PPS).

MagSafe® compatible wireless charge pad works with all Qi™ enabled smartphones including Android™ and will align iPhone® 12 or later magnetically. MagSafe® compatible cases recommended.

Fast wireless charging works with most standard thickness protective cases made of plastic. Remove any metal case or metal plate adhered to the back of your phone prior to charging. Metal cases and metal plates will cause interference that could damage your device.

Charging Your Device

1. MagSafe® compatible for iPhone® 12 or later. Center on magnetic charging pad. Magnets will align and grip while charging wirelessly.
2. Use universal magnetic ring adapter for Android™, earlier iPhone® models, thick cases and extra grip.
3. Center backside of phone on pad to grip magnetically and charge wirelessly.
4. Your device will display the charging progress on screen. Charging time varies by device.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).
