Frequently solutions:

Condition / Problems	Solutions
Multiple connections are unsuccessful	1.check whether the speaker is in the search state, the main device is selected the correct device name, or reboot. 2.peripheral Bluetooth devices too much, causing search difficulties, turn off other Bluetooth devices.
Voice is low or distorted	1.detect the Bluetooth device volume, adjust the volume to the appropriate location. 2.the battery voltage is low, please charge.
Sound off of the music	Whether the speaker is outside the effective connection distance, or speakers and Bluetooth devices have obstacles.
The Bluetooth status indicator does not light	1. The battery is low, please charge fully and try again. 2. Reboot.
Bluetooth connection distance becomes shorter or connection is unstable	Low power will affect the Bluetooth distance or Bluetooth is easy to disconnect, please charge in time.

Product parameters:

Product name	Portable speakers M9
Used battery	Replaceable lithium battery(3.7V, 2000mAh)
Power input	DC input: 5V 1000mA
Charging time	Normally it's about 3-4 hours, but the charging time will be different according to the battery left; please remember to unplug the charger when it's fully charged. Please note that charging with a charger, charging time can't be more than 12 hours or more.
Battery using time (when the battery is fully charged)	Audio: about 10 hours Note: The time mentioned in this manual refers to the test at the normal temperature of 25℃, the volume is mid-range, audio playback standard MP3 music bit rate of 20KHZ, continuous playback test. As the operating environment is different, the file format play, bit stream and other factors, the actual playback time may be different from the playback time of this test, which is a normal phenomenon.
Frequency response (horn)	100Hz-20KHz
Distortion degree (horn)	160±20%HZ
Signal to noise ratio(horn)	⩾75dB
Horn specification	4Ω5W*2
Size(L×W×H)	L175*W40*H78mm
Operating temperature	0℃ ～ 40℃
Storage temperature	-10℃ ～ 45℃
Maximum humidity	75%(no fog)
Bluetooth protocol and compatibility	BLUETOOTH V4.0+EDRstandard support A2DP. Compatibility such as IPAD、IPHONE(the second version and the updated IPHONE with the software 3.1)、IPOD TOCH、MAC with bluetooth, most smartphone and computers which support bluetooth.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
