Click "WIFI setup"—> select the WIFI network you want to use in the WIFI connection interface, and enter the password —> confirm. When the WIFI is successfully connected, the translating machine will broadcast "the wireless network is being used". More information is subject to the Iflytek translating APP.

Safety, operation and support

This device complies with Part 15 of the FCC Rules. Operation subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

The users' manual or instruction manual (or an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. In cases where the manual is provided only in a form other than paper, such as on a computer disk or over the Internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the capability to access information in that form.

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

Important Safety Information
[Warning] By not following these safety instructions, it may cause fire, electric shock, injury or may damage the translating machine and other properties. Please read all the following safety instructions before using the translating machine.

Battery: The battery of the translating machine can only be changed by iflytek or the authorized vendor. Do not privately change the battery.

Operation: This product is made of metal and plastic. There are sensitive electronic components inside. Throwing, turning, impaling and squeezing the machine, or contacting with liquid may cause damage to the machine.

Maintenance: Do not disassemble the translating machine or try to repair privately as it may cause damage to the machine and personal injury. If a damage, breakdown or contacting with liquid happened, please contact the after sale service.

Distraction: Under some circumstances, the translating machine may distract you, which may cause damage (For example, do not use the translating machine while driving). Please follow the rules of banning or restricting the use of mobile phone and earphone.
Using Environment: Avoid using the translating machine in too high or too low temperature. Avoid long time expose to strong sunlight or too damp environment. Do not sleep on the device or power adapter that are connected to the power, and do not put it under a blanket, a pillow or your body. While using or charging the translating machine, please put it and the power adapter in a drafty area.

Volume: Do not use high volume for a long time so as to prevent hearing loss.

Charging: To charge the translating machine, please use the attached cable and power adapter or standard power adapter that meets the national 3c certificate: input: 100-240V~50/60Hz 0.2A, output:5V==1A. Please contact the power adapter manufacture to check whether your power adapter meets these standards/

Important Processing information
Cleaning: If the translating machine contact with any contaminants that may cause stain, like dirt, ink, cosmetics, detergent, please clean it immediately. If you clean it:
• Unplug all cables and turn off the translating machine (long press the turn off button over 2 seconds).
• Use soft wiping cloth that is not raising
• Avoid damp in the opening
• Do not use cleansers or compressed air.
The front and back cover plate of the translating machine are made of plastic and are coated with oleophobicity that is fingerprint proof. Under normal usage, this coating may be abrased over time. Cleansers and corrosive materials may further weaken its function and may scratch the plastic.
When using the plug, port or button, do not insert the plug into the port forcibly or press the button too hard, because it may cause damage to the plug, port or button. This kind of damage is not included in the repair guarantees. If the plug cannot be easily inserted to the port, it means that they are not matched. Please check whether there is a barrier and make sure the plug is matched with the port, and the direction of the plug corresponds to the direction of the port.
It is normal that the USB will change color under normal usage. Dust, debris and penetration of moisture may also cause the change of color. If the data cable or the USB generate heat while using, or the translating machine cannot be charged or synchronized, please disconnect them with the computer or the power adapter, and use soft dry wiping cloth that is not raising to clean the USB. Do not use liquid or cleansers to clean it.

Operation Temperature
The translating machine better works in environment with temperature between -10℃ and 55℃. If the working temperature is out of this range, the translating machine may be damaged, and it will shorten battery life. Avoid putting the translating machine in environment with big temperature and humidity differences. It is normal that the translating machine will generate heat while using it and charging the battery.
[Attention] If the temperature is too high, you may not be able to use the translating machine. If the translating machine cannot adjust its inner temperature, it will turn it into deep sleeping mode until it is cooled. Move the translating machine to a cool place and avoid direct sunlight, wait for a few minutes and then try to use it.
