

M30 Quick User Manual

Keypad Management

Turn on: Press any key to turn it on.

Turn off: Remotely turn off via software.

Working mode

New keypad should match to the specific base station before use to avoid it being reused and added randomly.

- ①The matched keypads and base station can be identified automatically when used as a whole set without matching them again.
- ②Supports different working modes for different applications. User can set it via 'SunVote ARS Tool Kit'.
- ③**RF Frequency:**2403-2482MHz.

Support 2 working modes: match mode and free mode.

● Match mode

When to use: For a certain classroom. Multiple classrooms in one place need to avoid interference from each other and keypads can only communicate with the matched base station, cannot communicate with other base station in other classrooms.

How to use: Keypads connect to the base which is in match mode automatically when turn on.

How to match: When the match mode base is connected, follow the steps.

- ①Start 'Keypad Match' in SunVote ARS Tool Kit.
- ②Press a **SEND** the s **5/E** me for 3 seconds.
- ③ Keypad shows **OK** and the linked channel after successful match, just as **01L**. If failed, keypad shows **F**, then returns to the last matched channel.

● Free mode

When to use: For the user who votes at different classrooms. Keypad is able to communicate with any base station freely by inputting the correct channel of the base.

How to use: When the base station connects to computer and in free mode, input the channel number of the base station on keypad to connect to it.

How to set:

When the free mode base is connected, follow the steps.

- ①Long press **5/E** r 3 seconds and LCD shows **01L**, numbers blinks on the left.
- ② Press **1/A** scr **2/B** mbers, then press **SEND** to ct.
- ③Keypad shows **OK** and the linked channel after successful match. If failed, keypad returns to the last matched channel.
