Wall-Mount Wireless HiFi Multi-Room Stereo Amplifier

AMP-i50B

Quick Start Guide

Wireless HiFi Multi-room Audio System

www.ieast.net

Introduction

This amplifier is designed to add iEAST multi-room audio functionality to any pair of stereo speakers. The specialized iOS and Android applications offer you the easiest way to set up a Wireless Multi-Room Sound System. This amplifier also provides the most powerful playback option, which allows you to stream synchronized music or different music from cellphone, Spotify, Pandora, Tidal, Qobuz, vTuner, Napster and other online music services, and NAS/UPnP Network/-flash driver/HDD.

Featuring advanced Class D digital amplifier, this amplifier is of great performance with low distortion and high current capability.

How It Works

Installation Guide

Step 1 Unpack

Verify all the accessories are included in the package.

Step2 Place

Place this amplifier at a safe and proper location in your home.

Step3 Connect

1.Speaker Wiring Diagrams

2.Connect the Speaker

Speaker Wire Connection

Take the Speaker Connector Block that came with the AMP-i50B. Loosen the screws before connecting the speaker wires. Please insert the speaker wire ends properly and tighten down each screw. Note: negative (–) speaker wire on the outside terminal and positive (+) speaker wire on the inside terminal.

Power Connection

Option 1: Users can connect to the power supply with power adapter included in the accessories.

Option 2: Power Wire Connection. Locate the power connector, loosen the screws, insert the power wires, tighten each screw. Note: Left negative (–) , Right positive (+).
Note: The standard power input is 24V/3.3A.

Step 4 APP download

- To use your wireless amplifier, please download iEAST Play App from App Store or Play Store.

available in store:

Step 5 configure

Option 1- WIFI

Wireless Connection for iOS and Android devices

- Connect your cellphone to your home network.
- Run iEAST Play App and choose Add Device.
- Input the password of your home router in iEAST Play App.
- Press WPS button on amplifier to configure.

*Once connected, the device will be encrypted, the password is the same as your router's. To connect more units, no need to input password.

Option 2- web console

1. Get the device powered on
2. Choose the iEAST SSID as Wi-Fi router on your computer or mobile devices.
3. Open the browser and enter the <http://10.10.10.254>
4. Go for Wi-Fi setting->Choose your Wi-Fi router->Enter the password->Click Connect. The device will connect to the Wi-Fi router.

Option 3- LAN

1. Connect one head of the Ethernet wire to working Wi-Fi router and the other to LAN port on the device.
 2. Open the iEAST Play app you will see the device appear in the DEVICE LIST on the app in a few seconds.
- Follow the steps to get the device encrypted: Setting->SPEAKER INFO->Device Password->Input the password as required.

Note: Do not connect the Ethernet wire if you are connecting the amplifier to a wireless network.

Option 4 - bluetooth

1. Open the iEAST Play app.
2. Activate the Bluetooth on the app.
3. Activate the Bluetooth on your mobile device.
4. Choose the AMP-i50B's Bluetooth to pair.

Name Your Device

- After login, you can name your device as follows or rename your device.

Technical Specifications

Dimensions: LxWxH=14.6x13.4x3.1cm(5.748x5.275x1.22 in)

Weight: 0.5kg(1.1lb)

Connectivity:

1.Wireless network: IEEE 802.11b/g/n 2.4GHz Ethernet

2.Wired Connectivity: Single 10/100M J-45 jack

3.Bluetooth: BQB Approval, BT 4.0.

Serial port: RS232

Frequency Response: 20Hz to 20KHz.

Power Input: 24V/3.3A

Audio Source Input: USB2.0, Micro SD/TF card,

Music File Formats: MP3/AAC/AAC+/ALAC/FLAC/APE/WAV(Decoding supports up to 24bit/192kHz)

Warning

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
