ABOUT YOUR PHONE

NOTE: Devices and software are constantly evolving—the screen images and icons you see here are for reference only.

WARNING

This device has a non-removable battery. Do not attempt to remove the back cover. Doing so may severely damage the battery and 3-D phone, which could cause overheating, fire, injury, and loss of warranty. Please find a 3-D phone authorized customer service if you need technical support.

SETTING UP YOUR 3-D PHONE

Install a SIM card provided by your carrier to your 3-D phone.

1. With the 3-D phone's screen facing up, insert the pin tool that comes with your 3-D phone into the hole of the SIM/microSD card tray to partially eject the SIM card slot tray. Then, carefully pull the card tray out.
2. Insert the microSD card with the gold contacts facing down and toward the 3-D phone (as shown below).
3. Carefully insert the card tray back into the slot and close it.

NOTE: MicroSD storage card is sold separately.

CHARGE YOUR 3-D PHONE

Before turning on your 3-D phone, fully charge it.

Your 3-D phone comes with a fast charging charger, that has dual USB input ports and USB Type-C cable. Plug the USB Type-C cable into one of the USB/charger's ports as shown below and the other end into the charger. Then plug the 3-D phone charger into an outlet.

WARNING

- Do not charge while the 3-D phone or charging cable is wet. This can cause fire, electric shock, injury or damage to your 3-D phone.
- Use only approved chargers with your 3-D phone. Incompatible chargers or tampering with the charger port could damage your 3-D phone and void the warranty.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This Product meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of this Device E95 (FCC ID: 2AM06QPHONE2022) has been tested against this SAR limit. SAR information on this can be viewed on-line at <http://www.fcc.gov/oet/ea/fccid/>. Please use the device FCC ID number for search. This device was tested for typical operations 10mm from the body. To maintain compliance with FCC RF exposure requirements, 10mm separation distance should be maintained to the user's bodies

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
