Solder Board-Component View 4	 A photograph of a small, green, L-shaped printed circuit board (PCB) component. The component is positioned on a blue textured surface. A black L-shaped ruler with white markings in millimeters is placed next to the component for scale. The component has several small, dark, rectangular components (likely capacitors or resistors) soldered onto its surface. The ruler shows measurements up to 100 mm on both the horizontal and vertical axes.
Solder Board-Component View 5	 A photograph of the same green, L-shaped PCB component from a different angle. The component is positioned on a blue textured surface. A black L-shaped ruler with white markings in millimeters is placed next to the component for scale. The component has several small, dark, rectangular components (likely capacitors or resistors) soldered onto its surface. The ruler shows measurements up to 100 mm on both the horizontal and vertical axes.

Solder Board-Component View 6	 A photograph showing a small green printed circuit board (PCB) component with several solder joints. The component is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters. The ruler indicates the component is approximately 20mm wide and 10mm high.
Antenna View	 A photograph showing a larger green PCB component, which is an antenna module. It features various electronic components, including a microchip and several surface-mount components. A red rectangular box highlights a specific area on the right side of the board, labeled "BT Ant" with a red line pointing to it. The component is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters. The ruler indicates the component is approximately 40mm wide and 30mm high.
